ROBOTICS EVENTS

AEROCRAFT

AIM: Design and fabricate one lightweight hovercraft, easily maneuverable, quick, and strong. The hovercrafts face each other in an elevated arena with the goal of pushing the other hovercraft off the arena.

TEAM SPECIFICATION :

- A team can consist of 3 or 4 members, each team must consist of unique members.
- Not more than 2 members of a team can control the hovercraft at any given time.

GAMEPLAY :

A 1v1 faceoff between two hovercrafts. The hovercraft that gets pushed off the arena first loses the match.

PRIZE WORTH : 10K

Coordinator : Mandeep : +91-9021500267

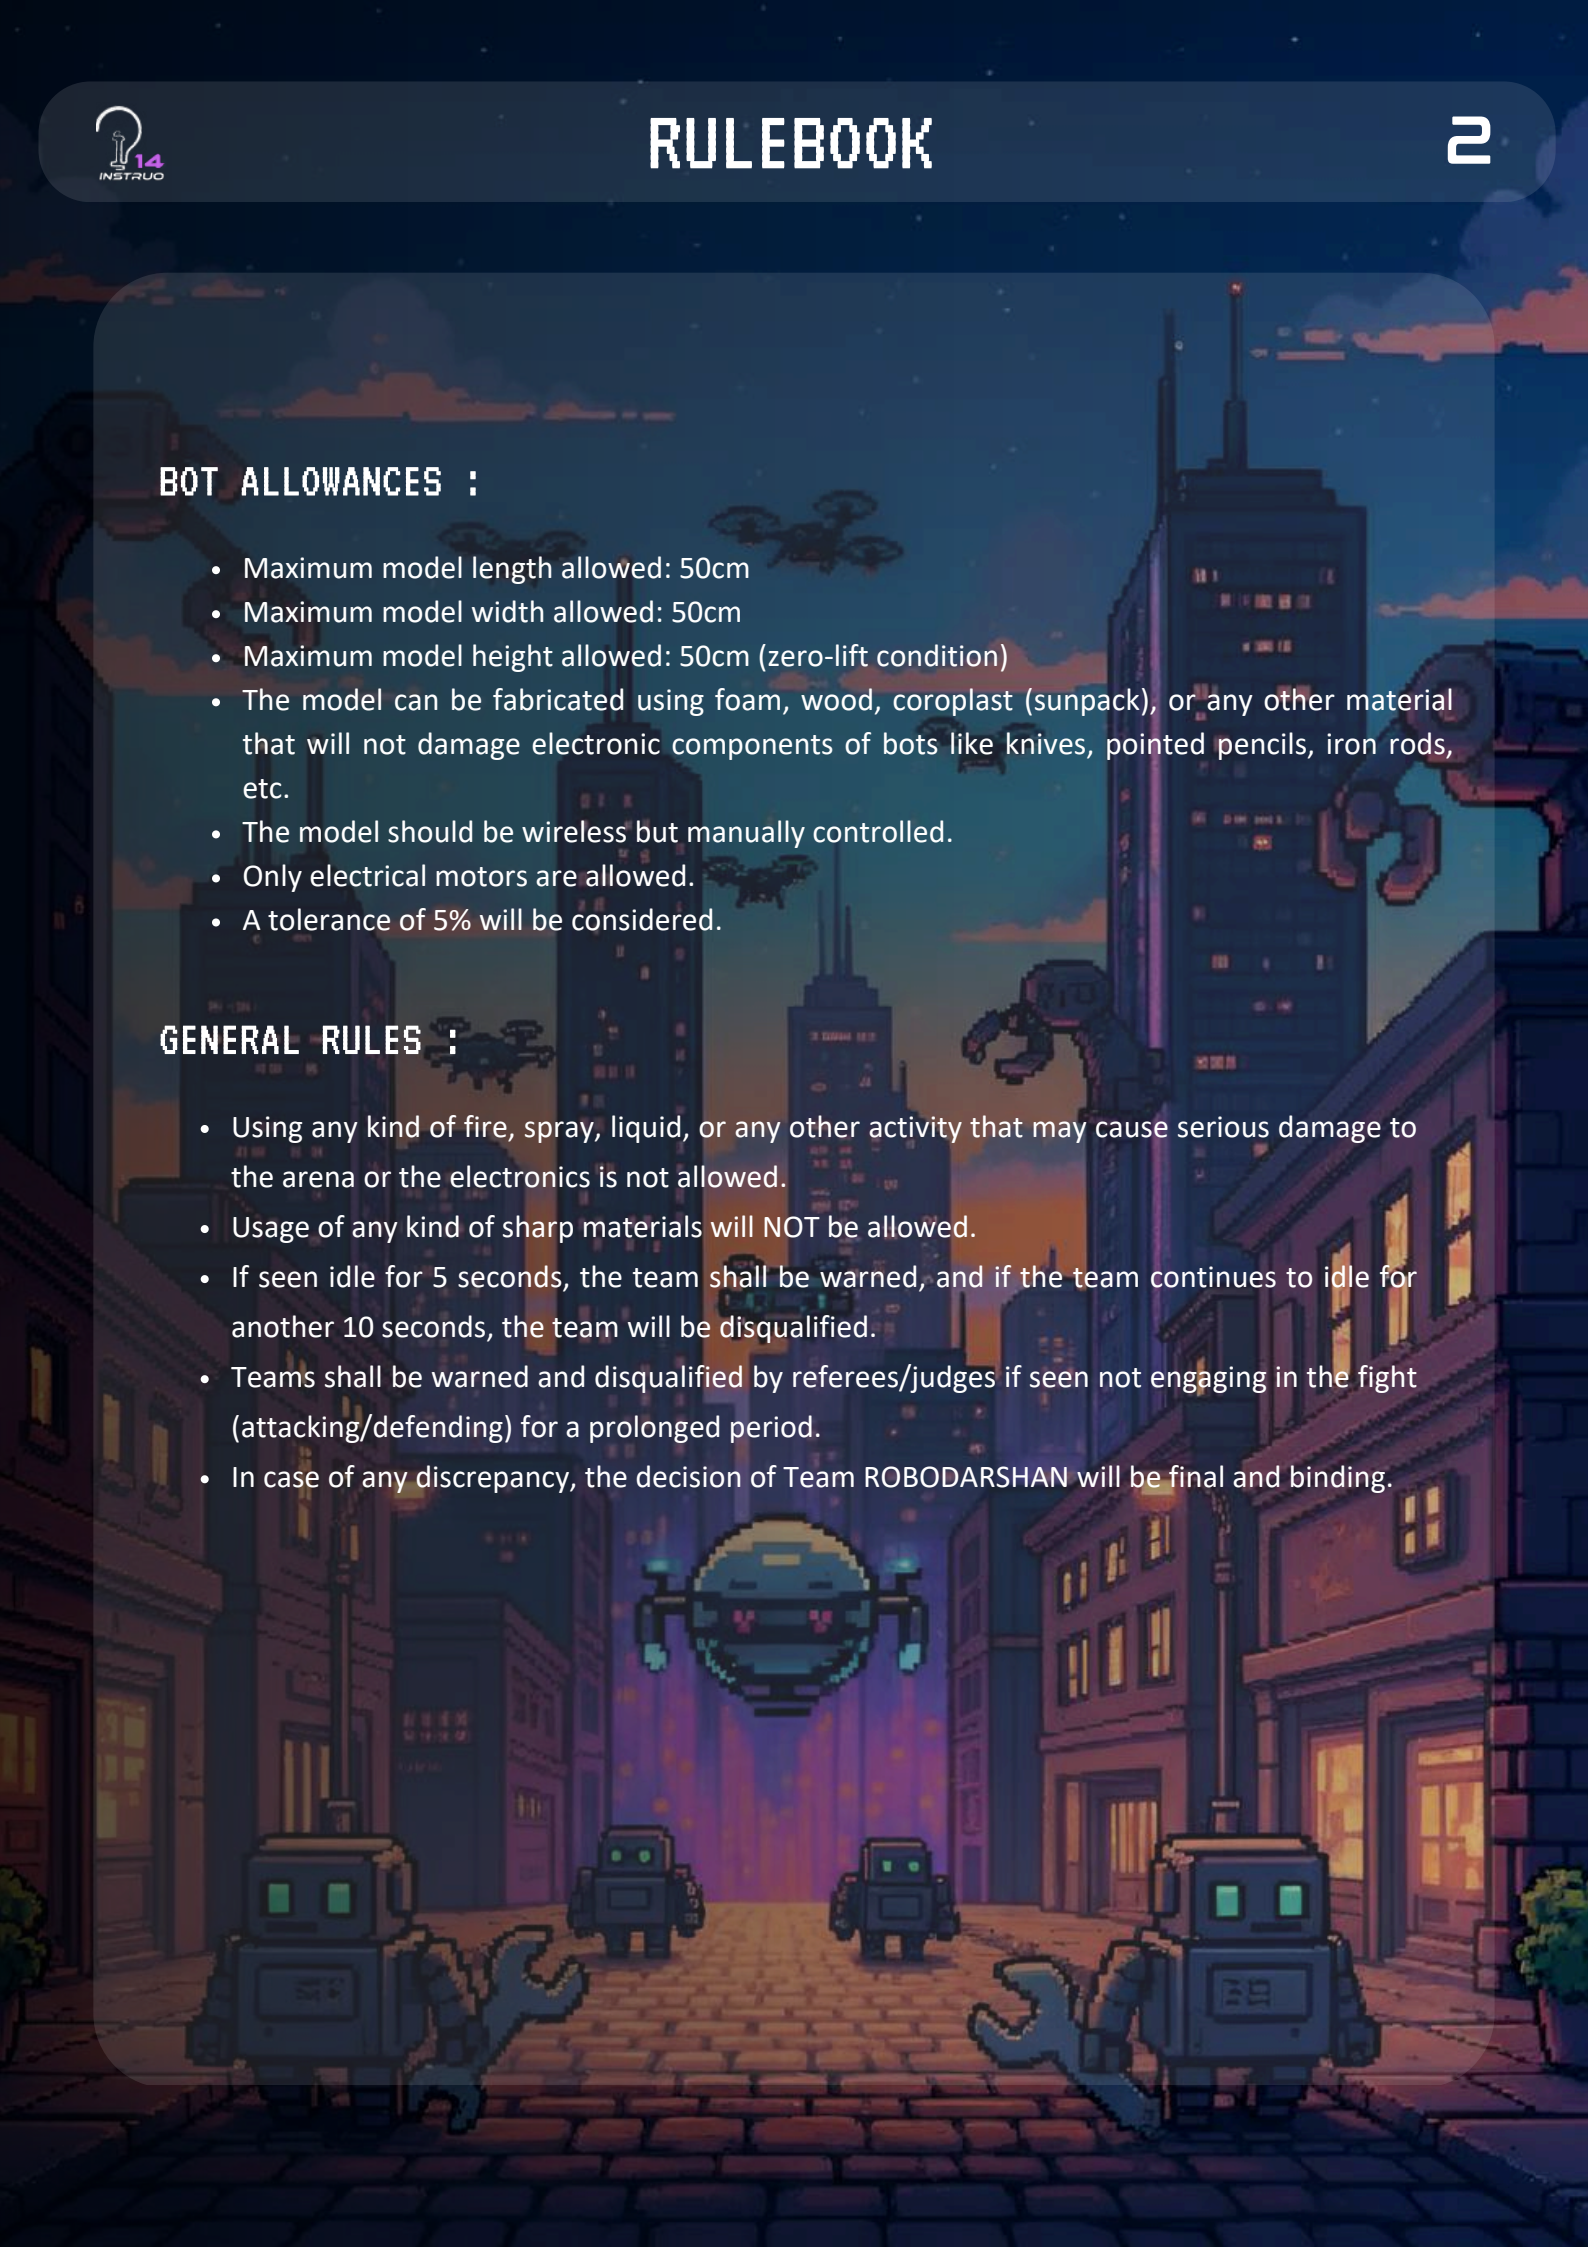

BOT ALLOWANCES :

- Maximum model length allowed: 50cm
- Maximum model width allowed: 50cm
- Maximum model height allowed: 50cm (zero-lift condition)
- The model can be fabricated using foam, wood, coroplast (sunpack), or any other material that will not damage electronic components of bots like knives, pointed pencils, iron rods, etc.
- The model should be wireless but manually controlled.
- Only electrical motors are allowed.
- A tolerance of 5% will be considered.

GENERAL RULES :

- Using any kind of fire, spray, liquid, or any other activity that may cause serious damage to the arena or the electronics is not allowed.
- Usage of any kind of sharp materials will NOT be allowed.
- If seen idle for 5 seconds, the team shall be warned, and if the team continues to idle for another 10 seconds, the team will be disqualified.
- Teams shall be warned and disqualified by referees/judges if seen not engaging in the fight (attacking/defending) for a prolonged period.
- In case of any discrepancy, the decision of Team ROBODARSHAN will be final and binding.

DEATH RACE

AIM: Build a robot that can be manually controlled to maneuver across a track with varying obstacles and carry a load.

TASK: Reach the finish line with minimum penalties in the least possible time.

TEAM SPECIFICATION :

- A team can consist of 3 or 4 members, each team must consist of unique members.
- Not more than 2 members of a team can control the bot at any given time.

GAMEPLAY :

It will be of two rounds, round 1 and round 2 will be final showdown round.

PRIZE WORTH : 15K

Coordinator : Pinak Parate : +91-9689311358

BOT ALLOWANCES :

- Maximum bot length allowed 30 cm
- Maximum bot width allowed: 25 cm.
- No restriction on height of the bot.
- The bot should be wired or wirelessly controlled.
- Only electrical motors are allowed.
- Maximum allowed potential difference of battery: 24V
- A 5% tolerance on dimensions is allowed.

ROUND 1 :

- Two teams compete simultaneously on identical tracks; one black and another is white (track will be decided by coin toss).
- Each track mirrors the same obstacles and terrain to ensure fairness.
- Both bots begin from the **Start Line** after the timer start.
- Each bot must navigate the obstacles and complete the course by crossing the **Finish Line** within **15 minutes**.
- **Winner:** The team whose bot completes the course in the shortest time earns **500 points**.
- **Runner-Up:** The slower bot earns **400 points**, provided it crosses the Finish Line within the time limit.
- **Failure to Finish:** If a bot cannot cross the Finish Line within 15 minutes, the team scores **0 points** for the round.

ROUND 2 (FINAL SHOWDOWN) :

- 1.Points from the first round will be carried forward in this round.
- 2.Second round will contain much more complex obstacles and terrains.
- 3.At a time one team will appear in this round.
- 4.In this round, score will be evaluated based on completion time by this formulae:
- $\text{Score} = (10 - \text{finish_time}(\text{mins})) \times 100 + \text{penalties}$

Final Score = Score of round 1 + Score of round 2

ROBORUMBLE

LIST OF COMPONENTS

- Arduino UNO / Nano / ESP 32 x1
- Motor drivers (L298N)
- BO motors (max 4) + wheels
- Bluetooth HC05 Module x1 (if required)
- 18650 3.7v Li-ion battery Max 4
- Chasis (metal not allowed)
- Dimensions – maximum allowed 18cm x 18cm + 5% tolerance
- Weight – maximum allowed 800gm + 5% tolerance

GENERAL RULES (ALL EVENTS)

- Participants must use components (motors, batteries, Arduino, jumpers, etc.) that are mentioned to maintain fairness and prevent any unfair advantages.
- The bot must be wirelessly controlled.
- Power components must be safe and official.
- Fouls (unsafe modifications, damaging arena, intentionally leaving arena, or damaging opponents) → disqualification.
- Referee decisions are final in all cases.
- Note: Point systems for events involving scoring (Event 1 & 3) are subject to change at the discretion of the organizers.

PRIZE WORTH : 15K

Coordinator : Pratyush & Mandeep : +91-8617780658

EVENT 1: BOT PURSUIT

Arena & Match Duration - Starts at 2m x 2m. - Match duration: 3 minutes.

Innings - Inning 1 → one bot is the chaser, the other is the runner. - Inning 2 → roles are reversed. - Starting roles decided by a coin toss.

Arena Shrinking (Length Only) - 0-1 min → 2m x 2m - 1-2 min → 1.5m x 1.5m - 2-3 min → 1m x 1m

Scoring (Per Tag)

- Tag in 2x2 m → 10 points
- Tag in 1.5x1.5 m → 5 points
- Tag in 1x1 m length → 2 points

- Tags in larger arena lengths have higher priority - Extra Points: Certain areas in the arena may be marked, and if the runner reaches them, they will be awarded extra points.

Winner - Decided by total points. - If bots collide and get stuck, the referee may pause and reset positions. - If no tag occurs in 3 minutes, a Sudden Death round happens in a 1m × 1m arena for 1 minute only. - If still no tag → match is declared a draw.

Additional Note - The actual arena design with obstacles will be revealed on the day of the event.

EVENT 2: TUG AND TUSSLE

Stage 1: Tug of War (Single-Elimination)

- 1 vs 1 knockout round.
- The arena size will be declared during the event.
- Teams must keep a hook in their bots for tying the thread.
- Each match is best of 3 rounds.
- The bot that successfully pulls the opponent across the line wins the round.
- If no clear winner (e.g., neither bot crosses the line), the judges decide the winner based on performance.
- Qualified teams advance to Stage 2: Robo Sumo.

Stage 2: Robo Sumo (Round Robin)

- Qualified teams from Stage 1 participate.
- The arena size will be declared during the event.
- Two bots start inside the arena. The goal is to push the opponent out.
- Each match is best of 3 rounds.
- A round is won when one bot forces the other completely out.
- If neither bot goes out within the announced time, judges decide the winner based on performance.
- Matches are conducted in a Round Robin format, with each team competing against others in their group.

EVENT 3: JUMP QUEST

Objective: - Jump Quest is a long jump type event, where bots jump from a ramp into the scoring zones. Performance is measured based on which zone the bot lands in.

Arena & Trials: - The actual arena layout will be declared on the day of the event. - Each bot gets 3 trials to attempt the jump. - Participants can choose how much run-up they want for their bot.

Scoring / Performance: - The arena will have 5 pre-marked zones: - Zone before Zone 1 → 0 points - Zone 1 → 100 points - Zone 2 → 70 points - Zone 3 → 50 points - Zone 4 → 0 points - Note: Zones and point system are subject to change at the discretion of the organizers. - The highest scoring trial among the 3 attempts determines the bot's performance.

Tie-breakers: - If there is a tie, a second stage/trial will be introduced. - If a tie occurs again, the average score of both rounds will be taken to determine the winner.

ROBO-SOCCER

AIM: Build a manually controlled robot capable of competing in a one-on-one game of soccer.

TEAM SPECIFICATION :

- A team can consist of 3 or 4 members, each team must consist of unique members.
- Not more than 2 members of a team can control the bot at any given time.

GAMEPLAY :

A face-off between 2 bots to score goals at the opposite end goal, with 2 minuted half with 1 minute break.

PRIZE WORTH : 10K

Coordinator : Swayam : +91-7985873384

ARENA SPECIFICATIONS :

- The arena dimensions are 243 CM X 122 CM X 19 CM.
- The Goal post is 50 CM wide and 15 CM deep.
- Centre circle diameter 25 CM.
- Goal post rectangle specification (Jarger one) 15 CM X 10 CM.
- SAFEZONE: Half circle of 30 CM radius marked in black.
- Arena floor material is stainless steel.
- A singular Plastic Ball will be used.

BOT ALLOWANCES :

- Maximum bot length allowed 30 cm
- Maximum bot width allowed: 25 cm.
- No restriction on the height of the bot.
- The bot should be wired or wirelessly controlled.
- The weight of the bot should not be more than 3 kg. The weight of wires and batteries will not be included.
- 5% tolerance on dimensions and no tolerance in weight is allowed.

GENERAL RULES :

- A participant's bot is not supposed to interact directly with the opponent's bot when it is not in possession of the ball. To gather the ball from the opponent intention must be to attack only the ball. Physical interaction between the bots in this process will be tolerated if it is judged that the attacking bot went for the ball.
- Any damage to the arena will lead to automatic disqualification.
- The participants may bring their own power supplies. The wires should be at least 10-12 m long for external power supplies. If the power supply is placed on the bot, it cannot be charged during the game.
- In case of any discrepancy, the Decision of Team ROBODARSHAN will be final and binding.

PRIZE DISTRIBUTION :

1st: 5k
2nd: 3k
3rd: 2k

ROBOWARS

AIM:

Design and construct a remote-controlled robot capable of fighting a tournament against another robot(s).

WEIGHT CATEGORY:

- 15 Kg
- 8Kg

TEAM SPECIFICATION :

- A team can consist of 3 or 5 members, each team must consist of unique members.
- Maximum 1 member can control one bot at any given time.

ARENA SPECIFICATIONS :

The dimensions of the arena will be: 16ft x 16ft x 5ft (l x b x h)

PRIZE WORTH : 1000000

Coordinator : Pratyush & Mandeep : +91-8617780658

MOBILITY :

- All robots must have easily visible and controlled mobility in order to compete.
- Methods of mobility include:
 1. Rolling (wheels, tracks, or the whole robot).
 2. Non-wheeled: non-wheeled robots have no rolling elements in contact with the floor and no continuous rolling or cam-operated motion in contact with the floor, either directly or via a linkage, but are not true walkers as defined below.
- Motion is "continuous" if continuous operation of the drive motor(s) produces continuous motion of the robot. Linear-actuated legs and novel non-wheeled drive systems are also allowed under this category.
- Mobility methods that are not allowed:
 1. Flying (using airfoil, helium balloons, ornithopters, etc.) is not allowed.
 2. The robots should not secure themselves on the ring surface by using suction cups, diaphragms, sticky threads, glue, or other such devices.

ROBOT CONTROL :

- The robot can be controlled through a wired or wireless remote.
- There should be a manual emergency stop button on the controller that overrides all functions and stops the bot.
- The robot can be controlled through a wireless remote, while all power supplies must be on board.
- There should be binding capability between transmitters and receivers.
- Only remotes with such a facility will be allowed.
- Remote control systems available in the market may also be used, while nonstandard or self-made remote-control systems can be used only after approval from the organizers.
- The team should pair up the wireless remote with the machine before putting it into the arena. No extra time will be provided for this once the bots are in the arena.

WEAPON SYSTEMS :

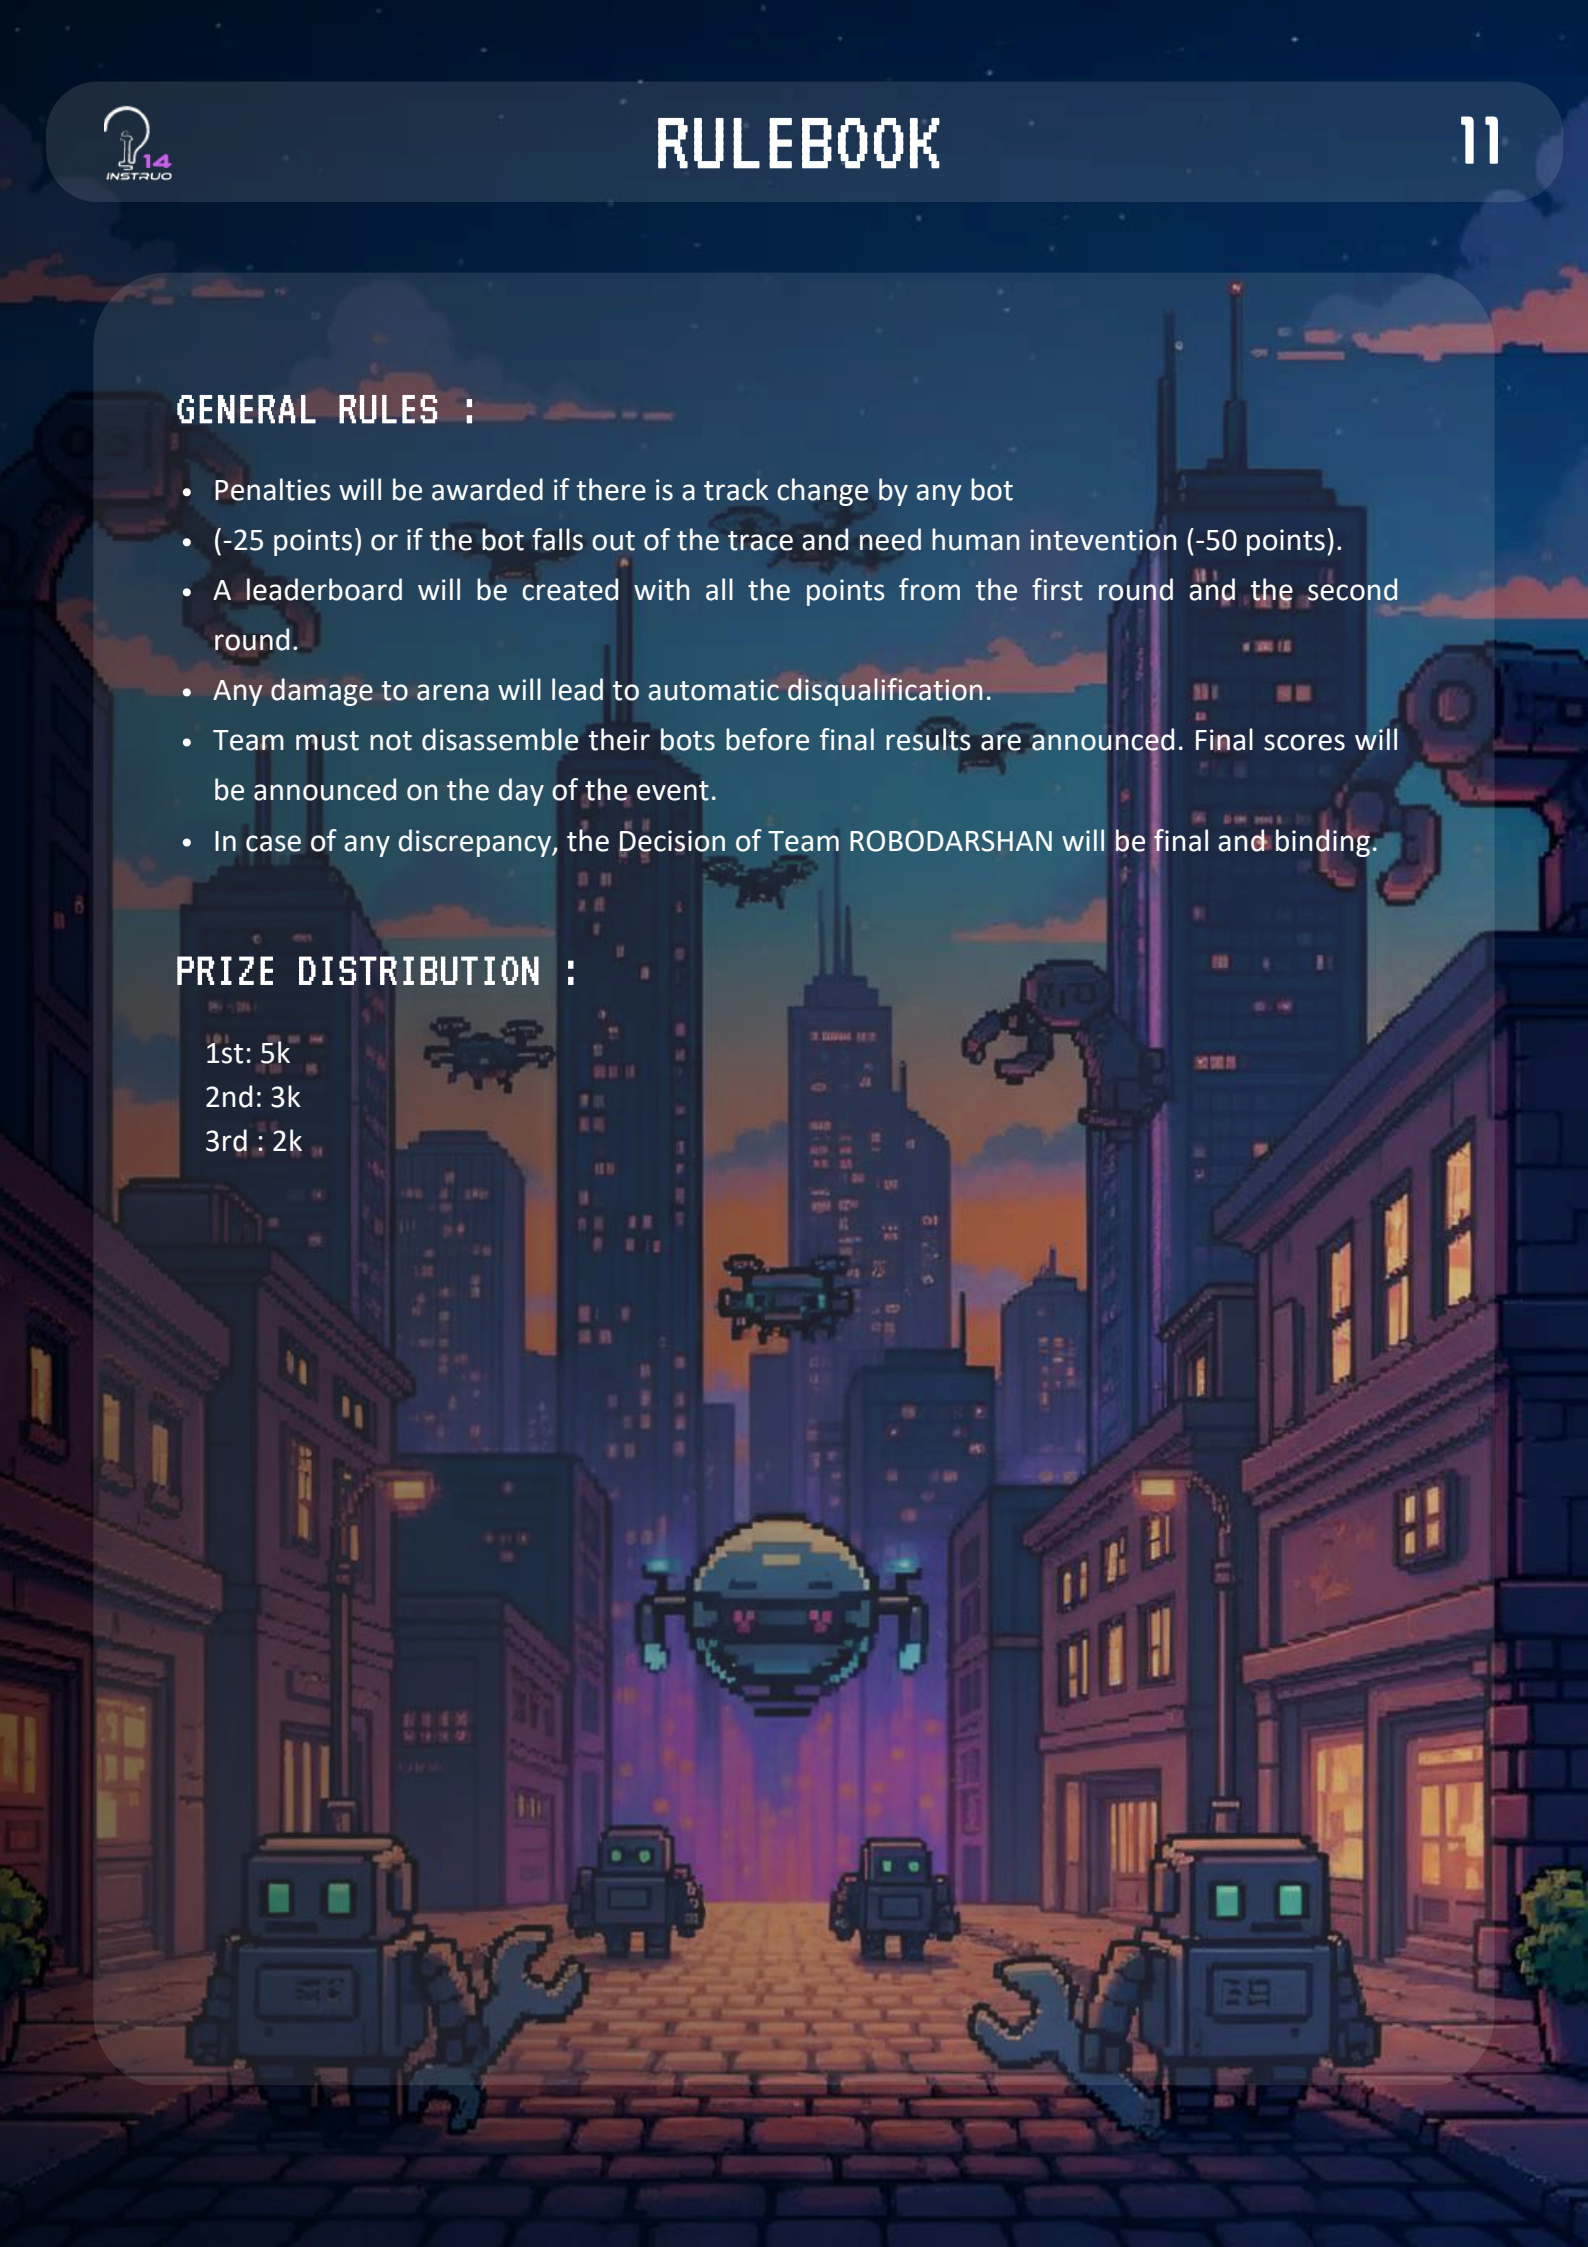

- Robots can have any kind of cutters, flippers, saws, spinning hammers, etc.
- The following weapons can not be used:
 1. Weapons causing invisible damage (Electrical weapons, RF jamming weapons, and others).
 2. Weapons causing opponents' weapons (spinners) to entangle in them (Chains, Ropes, or loose Fabrics).

GENERAL RULES :

- Penalties will be awarded if there is a track change by any bot
- (-25 points) or if the bot falls out of the track and need human intervention (-50 points).
- A leaderboard will be created with all the points from the first round and the second round.
- Any damage to arena will lead to automatic disqualification.
- Team must not disassemble their bots before final results are announced. Final scores will be announced on the day of the event.
- In case of any discrepancy, the Decision of Team ROBODARSHAN will be final and binding.

PRIZE DISTRIBUTION :

1st: 5k
2nd: 3k
3rd : 2k

TECHNICAL EVENTS

CAD CATALYST

AIM: CAD CATALYST will be a test of the skills one has in the field of drawing and designing with the help of Computer Aided Designs. By obtaining this certification, an individual demonstrates their expertise in using CAD software (AutoCAD, Solidworks, Fusion360, CATIA) and can enhance their professional credibility in the industry. It will be an individual participation competition boosting the creativity and innovation in designing the best world for us!

GAMEPLAY:

Individual competition for CAD designing and detailing in two rounds R1 and R2, both eliminatory.

PRIZE WORTH: ₹6K

Coordinator : Ayush Dutta : +91-8972851567

ROUND DETAILS :

ROUND 1:

Participants have to recreate a drawing from the given diagram in any CAD software (AutoCAD is preferred). They have to complete the drawing in the given time frame.

ROUND 2:

Qualified participants from Round 1 will get a problem statement given on the spot which they have to complete in a limited time.

GENERAL RULES :

- Participants are required to bring their own laptops/devices for the event.
- Power plug-ins will be provided by the organizers.
- Ensure that the necessary software is installed on your device prior to the start of the event.
- If you encounter any issues during software installation, notify the coordinator in advance. In such cases, only AutoCAD software will be provided, regardless of your preference.
- The event will consist of two rounds:
 - a. Round 1: Duration of 1 hour.
 - b. Round 2: Duration of 1.5 hours.

PRIZE DISTRIBUTION :

1st: 5k

2nd: 2.5k

3rd : 1.5k

DOPED

AIM - Bias your thoughts, amplify your ideas and drift through the world of circuits Instruo , along with the Department of Electronics and Telecommunication Engineering, brings forth 'Doped' a heaven for the fanatics of electronics to explore the 'Dope' world of semiconductors. Work your way through the rounds, hold on to your electrons and embrace the world of electronics.

TEAM SPECIFICATION -

Maximum 2 members each team.

GAMEPLAY - PRE-REQUISITE KNOWLEDGE:

Basic understanding of Electronics Engineering concepts

PRIZE WORTH: ₹8K

Coordinator : Divyanand Tripathi : +91- 8305274961

ROUND DETAILS-

- Round 1 : Quiz :-Participants will attempt 30 questions in total.- 20 Technical Questions: Topics include RLC circuits, Digital Logic, Network Theory- 10 Aptitude Questions: Focus on mathematical reasoning.
- Round 2: Advanced Quiz or Task:- Details will be provided after the results of Round 1. Teams will solve questions or tasks of a similar difficulty level to placements and internships.

MARKING SCHEME/JUDGING CRITERIA :

Technical Questions: +1 mark for correct answers, -0.25 for incorrect answers. Aptitude Questions: +2 marks for correct answers, -0.5 for incorrect answers.

GENERAL RULES -

No calculators are allowed. Adherence to the marking scheme is mandatory. Malpractice will lead to immediate disqualification.

PRIZE DISTRIBUTION :

1st: 4k
2nd: 2.5k
3rd : 1.5k

HARDNESS HUSTLE

EVENT OVERVIEW:

“Hardness Hustle” is a two-round technical competition designed to test participants’ knowledge and practical skills in materials engineering and heat treatment processes. Contestants will compete to achieve the maximum hardness in a mild steel sample through proper heat treatment and testing.

PRIZE WORTH: ₹8K

Coordinator : Himanshu Kumar +91-7413920624

ROUND DETAILS:

Round 1: Technical Quiz

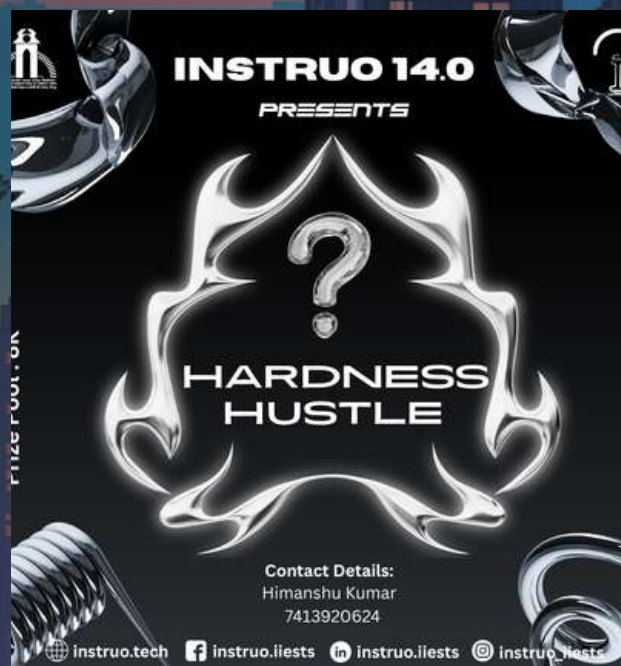

- Type: MCQ-based
- Content: General quiz.
- Selection: Top 24 participants with the highest scores will qualify for Round 2.

Venue: Department of Metallurgy and Materials Engineering

Round 2: Heat Treatment Challenge

Qualified contestants will form a group of 2 people.

- Task: Each group will be given a mild steel sample. Each group must provide their heat treatment process to achieve maximum hardness. Heat treatment of samples will be done by the lab assistant and event coordinators.

- Optional Step: Participants may polish their samples before testing.
- Testing: Brinell Hardness Number (BHN) will be determined by the participants under supervision of lab assistant.
- Winner: The group obtaining the highest Brinell Hardness Number (BHN) will be declared the winner.

Venue: Foundry lab

GENERAL RULES

1. The competition is individual for round 1.
2. For round 2, qualified contestants can form their own group of two people and if failed to do so group will be made by the event coordinators.
3. Participants must report to the venue 15 minutes before the start of each round.
4. Use of mobile phones or reference material during the quiz is strictly prohibited.
5. In Round 2, participants are not allowed to operate the furnaces on their own and must use only the tools and materials provided by the organizers.
6. Heat treatment must be done within the allotted time.
7. Samples must be submitted to the event coordinator after polishing (if done).
8. BHN calculations must be shown clearly for evaluation.
9. Judges' decision will be final and binding in all matters.

SAFETY PRECAUTIONS

1. Participants must wear t-shirt along with jeans and shoes.
2. Participants are not allowed to wear nylon or woolen clothes.
3. Girl participants should tie their hair properly.
4. Participants must wear heat-resistant gloves (will be provided in lab) during heat treatment and quenching.
5. No unauthorized equipment or flammable materials should be used.
6. Ensure proper handling of hot samples—use tongs or pliers.
7. Quenching must be done carefully to prevent splashing or burns.
8. Any unsafe behavior will lead to immediate disqualification.
9. In case of any injury or emergency, report immediately to the event coordinators.

PRIZE DISTRIBUTION :

1ST PLACE: RS 4000

2ND PLACE: RS 2500

3RD PLACE: RS 1500

HYDROBLAST

EVENT OVERVIEW :

Welcome to Hydroblast, the ultimate water rocket competition. Assemble your team and get ready to launch a rocket powered solely by water and air pressure. Using a standard 2L bottle, your challenge is two-fold: first, achieve maximum distance, and second, hit a designated target with precision.

TEAM SPECIFICATION :

- May consist of 2-4. Each team participants.
- All team members must be registered before the competition begins.

GAMEPLAY :

- Each team will be given two launch attempts.
- The best score from the two launches will be considered for the final ranking.

Any form of cheating, unsafe behavior, or rule violations will result in disqualification.

ROCKET SPECIFICATIONS- :

- Rockets must be powered solely by water and air pressure. The maximum allowed bottle size/maximum rocket capacity is 2 liters.
- Nose of the Rocket should not pointy. Pointy rockets will be rejected.
- No chemical propellants, explosives, or flammable materials are allowed. Fins and other stabilizing components must be securely attached.
- LAUNCH SYSTEM: Participants must have their own launch system. Launch systems must be designed to release rockets safely.
- The launch angle must not exceed 60 degrees from the vertical.

SCORING CRITERIA :

- In the 1st round - Points awarded based on the distance traveled by the rocket.
- In the 2nd round - Points awarded for hitting designated targets or landing zone.
- Launch Stability: Points for smooth and stable rocket trajectory.
- Design & Innovation: Points for creativity and design efficiency (lighter, aerodynamic designs).

GENERAL RULES :

- All participants must wear safety goggles during launch. The launch area must be clear of people, and a safe distance should be maintained.
- Only designated officials are allowed to approach rockets before launch. Rockets must be filled with water to a maximum of 50% of the bottle's volume.
- Teams are responsible for cleaning up their launch area after the competition.
- In case of bad weather, the competition may be postponed at the organizers' discretion.

CONTACT :

MEHUL MEHTA : 7973924794

PRIZE POOL 4.5K

NARRIMATE

Rules & Guidelines

- 1. Team Size:** Each team can consist of 1 to 3 members only.
- 2. Submission Limit:** Only one entry per team.
- 3. Video Duration:** Each short video must be 1.5 to 3 minutes in length
- 4. Creation Tools:** You may use AI tools (e.g., Veo 3, Gemini, flow) or create/animate by yourself.
- 5. Language:** Videos can be created in any language. There are no language restrictions.
- 6. Originality:**
 - The script and concept must be your own creation.
 - Direct copying from existing movies, shows, or online content will lead to disqualification.
- 7. Content Restrictions:**
 - No foul language, vulgar content, hate speech, or political remarks.
 - Violating this will result in immediate disqualification.
- 8. Submission:**
 - The submission window is from 21st to 27th October 2025. Late submissions will not be accepted.
 - It is the responsibility of the team representative to ensure the form and video are submitted properly.

9. Evaluation:

- All submitted videos will be posted on the official Instagram page on 28th October 2025, and like counts till 31st October will be considered.
- The Top 10 videos (based on likes) will qualify for the final round.
- These shortlisted videos will be presented to the judges on 1st November 2025 to decide the Top 3 winners
- Judges will evaluate the entries on the basis of the following parameters:
 - Art Style – Visual creativity and overall aesthetic.
 - Uniqueness – Originality of concept and presentation
 - Script/Storyline – Clarity, creativity, and engagement of the narrative

PRIZE WORTH : 6k

CONTACT

Dhruv Kumar 7783036251

RISE ABOVE

Format of the Competition

- Participants must bring their aircraft and required equipment.
- Competition will be conducted at IEST Shibpur, Lord's Ground.

Problem Statement

- Each team must design and operate a remote-controlled fixed-wing aircraft.
- The aircraft should maximize payload capacity while maintaining stability and control.
- Golf balls (45g, 43mm diameter) will be used as payloads, supplied by the organizers.
- The competition will take place in an open ground.
- Two rounds will be conducted.

Qualifier Round

- This round tests the aircraft's ability to maintain stable flight.
- Teams must ensure their aircraft can stay in the air for at least 45 seconds (without Payload)
- The top 40% of Total teams will move on to the Main Round based on their performance.

Main Round

- This round tests the aircraft's ability to maintain stable flight with carrying Payload.
- Teams must ensure their aircraft can stay in the air for at least 30 seconds with the Payload.
- Payload must be enclosed within the aircraft.
- Land safely with the entire payload intact inside the aircraft (no payload should dislodge before touchdown).

Scoring Criteria:

- $\text{Score} = (\text{Weight of Payload Carried} \times 100) / \text{Weight of Aircraft without Payload}$.
- Aircraft failing to complete a 30-second flight will receive a score of 0.
- The aircraft must complete the flight (take-off to landing) within a maximum time of 3 minutes

Contact :

- Mehul Mehta 7973924794

Prize Pool : 8K

Team Structure

- Minimum 2, maximum 4 members per team.
- An optional mentor may accompany but cannot assist during the competition.
- Team members can be from different colleges/schools.
- Multiple teams can participate from the same institution.
- Only students can participate; a Bonafide certificate or ID are required.

Aircraft Design Constraints

- Aircraft must be a self-built fixed-wing RC aircraft (No RTE, ARF, or BNF models).
- Design Constraints:
 - Maximum weight: 800 g (excluding payload)
 - Maximum wingspan: 1 m
 - Propeller diameter: ≤ 13 inches
 - Thrust-to-weight ratio (T/W) ≤ 1 without payload (excess thrust will be neutralized with added weight)
- Payloads must be carried internally.
- Only electric motors allowed (IC engines and other thrust methods prohibited).
- No gyroscopes or programmed assistance in receivers allowed.
- No pre-programming for any part of the mission.
- No FPV or external flying aids.

General Guidelines

- Judges will inspect and approve the aircraft before take-off.
- Each team gets two attempts in each round; the best score will be considered.
- Aircraft must be launched within 60 seconds after the previous team finishes.
- 2.4 GHz radio use is required for all aircraft; any other frequency must be reported to the organizers in advance.
- Receivers installed in the aircraft must be in 'receiver mode only'.
- All systems (Servos, motor, etc.) will be checked for functionality by organizers, and non-working systems will result in team dismissal.
- The pilot may position himself at any point in the arena to fly the aircraft.
- Flying outside the designated zone, which includes overhead of the event organizing and control section, will result in disqualification.
- Teams should carry additional components (motors, batteries, propellers, etc.) to avoid delays, as not being ready at your turn means losing time or an attempt.
- Teams must not share any part of their aircraft with others, as each team is expected to have all necessary equipment.
- Metal propellers are not allowed.
- Models can achieve powered take-off with landing gear or be launched manually by a person on the ground.

A team member cannot be part of more than one team.

TRUSST IT

EVENT OVERVIEW :

Welcome to TRUSSt It, an engineering challenge where teams design and construct a bridge using only specified materials. The objective is to build the strongest and most efficient bridge that can withstand the maximum possible load before failure. This event will test your creativity, engineering knowledge, and teamwork.

TEAM SPECIFICATION :

- Each team must have 3-4 members.
- Teams must register before the event deadline to participate.

MATERIALS & ADHESIVES :

The entire bridge must be constructed ONLY from the following materials that'll be provided:

- Popsicle Sticks
- Adhesive
- Cardboard

BRIDGE DIMENSIONS & SPECIFICATIONS :

All bridges will be inspected before testing. Failure to meet these specifications will result in penalties or disqualification.

CONTACT :

Harsh Gautam : 9761312100

- **Total Span:** The bridge must span a gap of at least 45 cm. It must rest on the testing platforms on either side of the gap.
- **Overall Length:** The total length of the bridge must not exceed 60 cm.
- **Overall Width:** The bridge's width must not exceed 15 cm.
- **Overall Height:** The bridge's height must not exceed 20 cm from the base of the testing platform.
- **Bridge Deck (Roadway):** The provided cardboard must be used to create a flat, continuous roadway that is at least 8 cm wide.
- **Loading Zone:** The bridge must have a clear loading space at the center of its span.

COMPETITION PROCEDURE :

The event will proceed in three stages:

1. Check-in & Inspection: Teams will submit their pre-built bridges. Judges will inspect the bridge to ensure it complies with all dimension, material, and weight specifications.

2. Weigh-in: Each qualifying bridge will be officially weighed. This weight will be recorded for calculating the final efficiency score.

3. Load Testing:

- The bridge will be placed on the testing apparatus across the 50 cm span.
- A loading mechanism will be placed at the center of the bridge.
- Weight will be added incrementally in a controlled manner by the event coordinators.
- Loading continues until the bridge experiences a structural failure.
- The maximum load held just before failure is recorded as the bridge's capacity.

JUDGING CRITERIA & SCORING

1. Structural Efficiency (Primary Score - 80%)

This score measures the strength of the bridge relative to its own weight. The formula is:

Structural Efficiency = Maximum Load Supported (grams) / Mass of the Bridge (grams)

Example: If a 150g bridge holds 15,000g (15 kg), its efficiency score is $15,000 / 150 = 100$.

6.2. Aesthetics & Design (Secondary Score - 20%)

- **Visual Appeal:** The overall look and neatness of the bridge.
- **Creativity & Originality:** Uniqueness and innovation in the design.
- **Workmanship:** Quality of construction, clean joints, and precise cuts.

DISQUALIFICATION

A team may be disqualified for any of the following reasons:

- Using prohibited materials.
- Exceeding the maximum weight or dimension limits significantly.
- Poor sportsmanship or failure to follow instructions from event staff.
- Any attempt to cheat or tamper with the testing process.

The decision of the coordinator will be final.

PRIZE POOL

1ST WINNER- RS.3000

2ND WINNER- RS.2000

3RD WINNER- RS.1000

WIRED IN

TEAMS:

1. Each team should have maximum of 4 members.
2. Each team should have a team leader.

ROUNDS:

Round 1: -> This round will be a quiz based on the domain of basic electrical and electronics engineering and related science.

Round 2: -> This round will be based on your technical skills involving circuits and further details will be given on the spot.

RULES:

1. Participants must report 15 minutes prior to each round.
2. Use of any kind of electronic devices is strictly prohibited.
3. Coordinator's decision is final and no arguments will be entertained.

CTF-RULES:

1. Please refrain from sharing flags, doing so would result in disqualification.
2. No public discussion on challenge details or solutions to challenges, while the CTF is on.
3. If you find a bug or issue in a problem, contact the organizers directly.
4. No flag hoarding. Submit the flags as soon as you find it. Points for each question would reduce on the basis of the number of teams who have solved the question.
5. The flags will be of the following format: EOF{h3r3_w3_90_4941n}
6. The team size is maximum 3 players.
7. You are not allowed to brute-force any challenge unless otherwise specified. Doing so without approval will lead to immediate disqualification.
8. Usage of LLMs is allowed.
9. Teams are required to maintain comprehensive solution writeups for all solved problems. These records must be available for organizer review upon request, and failure to provide them may result in disqualification.
10. Tie-breaker between teams having equal points would be decided on the basis that which team reached that score earlier.
11. **The decision taken by organizers regarding all disputes is final.**

ODE TO CODE

DESCRIPTION:

Instruo in collaboration with CodeIIEST will be hosting its highly anticipated competitive programming contest called 'Ode to Code'. It will be a 2-hour on-site contest, hosted on the Codeforces platform, with individuals battling it out to solve a series of challenging algorithmic problems. Participants from various colleges are welcome, making it an inter-college contest, and open to all students from 1st to 4th year.

Rules

1. Platform : The contest will take place on Codeforces.
2. Mode of Contest : On-site, preferably in the IT Lab/CST Lab.
3. Duration of the Contest : 2 Hours.
4. Team Size : Individual participation only.
5. Problem Set : A set of problems covering a wide range of topics such as data structures, algorithms, and combinatorics.

PRIZE WORTH : 9K

Coordinator : Abhinav Verma: +91-9151740565

6. Cheating Prohibition : Standard Codeforces rules apply:

- No collaboration with other participants.
- Discussion of problems during the contest is prohibited.
- Sharing solutions, hints, or approaches during the contest is strictly forbidden.
- Plagiarism detection tools will be used, and participants found to be copying code from others will be disqualified.

7. Use of Online Resources : Participants can refer to standard programming language documentation but cannot refer to problem-specific tutorials, blogs, or external help during the contest.

8. Judging Criteria : Based on the number of problems solved, time taken to solve them, and penalties for wrong submissions.

9. Scoring : Standard Codeforces scoring system, with points assigned to problems and penalties applied for incorrect submissions before the correct one.

10. Environment Setup : Participants will be required to bring their laptops, with Codeforces accounts ready and configured for participation. The contest environment will be monitored to ensure fairness.

11. Disqualification : Any participant found violating the rules will be disqualified from the contest and may face further disciplinary action.

PRIZE DISTRIBUTION :

GENERAL EVENTS

BATTLE OF BARDS

ROUND 1: SCRABBLE

Leader: Swastika Ghosh

(swastikapalashipara@gmail.com, 8649809492)

All registered teams

Word formation round

Make words based on Scrabble regulations

Find the same here

Participants have to make meaningful words out of a given bunch of letters.

Each set contains 7 letters only

Words to be made should contain the letters given in the set

A letter can be used as many times as it is given in the set.

If the given set of letters is (R, O, M, I, A, G, T) then the participants can make words like ROAM but not AROMA

However, if the given set is (R, O, M, I, A, G, A) then the participants are allowed to make words like AROMA

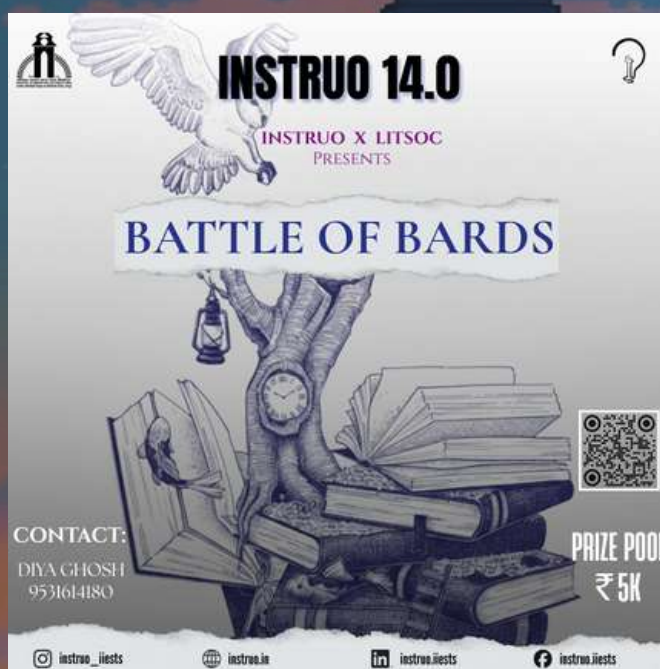

The game in totality will have 4 sets containing 7 letters each

For every given set, participants will have to provide an estimate of how many words they can make up (say 8 words)

Suppose, the participants make more than their given estimate. they will be awarded 100 points for all the words till the estimate and only 50 points for the words after the estimate

Say 8 words are the estimate then the participant will be awarded 100 points for each word making the total score 800 points

If the participant gets more than 8 words (which was estimated), say 10 words, 50 points will be awarded to each such extra word, making the total score $(8 \times 100) + (2 \times 50) = 900$ points but not $10 \times 100 = 1000$ points)

Suppose, the participant falls short of the estimate, 50 will be deducted for each word not made. Say 8 words are the estimate and only 6 words were made making two words lesser than the estimate. Then 100 points will be awarded to each of the 6 right words made and 50 points will be deducted for the two words short of estimate. Hence the total score would be $(6 \times 100) - (2 \times 50) = 500$ points).

ROUND 2: CROSSWORD

Leader: Anwesha Chowdhury (anwesha.20307@gmail.com 7811056514)

Top 12 teams

Cryptic crossword round in quiz format - Crossword sheets shall be printed and handed out to all the participating teams.

To each word, its corresponding riddle would be presented on the projector screen, and to each riddle, a time limit would be implied (maybe 2 mins or so). There can be star questions too for tie breaking, just in case.

The difficulty level of riddles shall go on increasing.

Maximum correct words takes the team to the final round.

Business/tech words

Can return the crossword for correction if all is not correct on the first try otherwise / repeat questions once more for participants to fill out the missing places and also to cross check their existing answers.

We have to first decide upon the crossword grid, and then form riddles and words accordingly.

ROUND 3: *MYSTERY ROUND*

Leader: Shruti Tudu(2024eeb025.shruti@students.iests.ac.in +916297991640)

Top 5 teams will qualify

The rules of this round will be revealed on the day of the event.

GENERAL RULES:

Team sizes may vary from 2-4

Registration will be through Google forms.

PRIZES: 5K

CONTACT : DIYA GHOSH 9531614180

CHITRAKATHA

AIM:

Chitrakatha brings the magic of storytelling into the lens of photography. Participants will create a sequence of photographs that narrate a meaningful, creative, or thought-provoking story.

FORMAT:

- Type: Individual.
- Submission: Participants will submit 3–7 photographs arranged in a sequence.
- Presentation: Participants may give a title or one-line caption to the entire story.

RULES AND GUIDELINES:

- Photographs must be original and taken by the participants (no stock or internet images).
- Minimal editing is allowed (exposure, brightness, contrast, cropping) but no heavy manipulations.
- Each sequence should clearly convey a narrative when viewed in order.
- Maximum submission: 7 photos per entry.
- Entries must be submitted in digital format (JPEG/PNG, high resolution).
- Late submissions will not be accepted.
- No watermark or no signature Allowed on the photo.
- In the drive, you've to make a folder of your name with title or one line caption for your story and within that folder make two folders having name 'Edited' and 'Raw' and upload the photos in their respective folders.

JUDGING CRITERIA:

- Storytelling Impact (30%) – Does the sequence narrate a clear and engaging story?
- Creativity & Originality (30%) – Unique interpretation of the theme.
- Photography Skills (40%) – Composition, lighting, framing, technical quality.
- In case of tie, Storytelling Impact will be prioritized.

PRIZE POOL: 1ST - ₹4500 | 2ND - ₹2500 | 3RD - ₹1500

CRAFT'N CUT

Aim: Craft'N Cut is a video editing and filmmaking competition held offline, challenging participants to create an impactful short film or video edit within a limited timeframe.

TEAM SPECIFICATION:

Each participant competes individually; teams are not allowed.

GAMEPLAY PRE-REQUISITE KNOWLEDGE:

Basic understanding of Electronics Engineering concepts

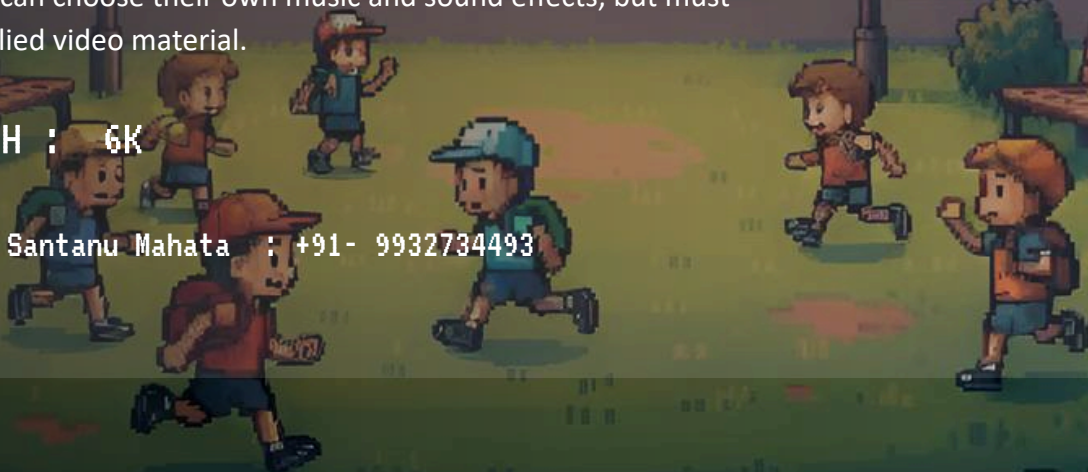

GAMEPLAY:

- The total event duration is 2 hours.
- All work related to editing and it's submission, must be completed within this timeframe.
- Footage is provided by organizers; use of outside footage is not permitted.
- Maximum allowed length of the submission is 2 minutes.
- Participants can choose their own music and sound effects, but must use the supplied video material.

PRIZE WORTH : 6K

Coordinator: Santanu Mahata : +91- 9932734493

SOFTWARE ALLOWED:

- Preferred tools: Adobe Premiere Pro, Davinci Resolve, Adobe After Effects, Final Cut Pro
- Participants must bring their own laptops and headphones; other gadgets are neither provided nor allowed.

JUDGEMENT CRITERIA:

Judges' decisions are final.

Scoring Breakdown:

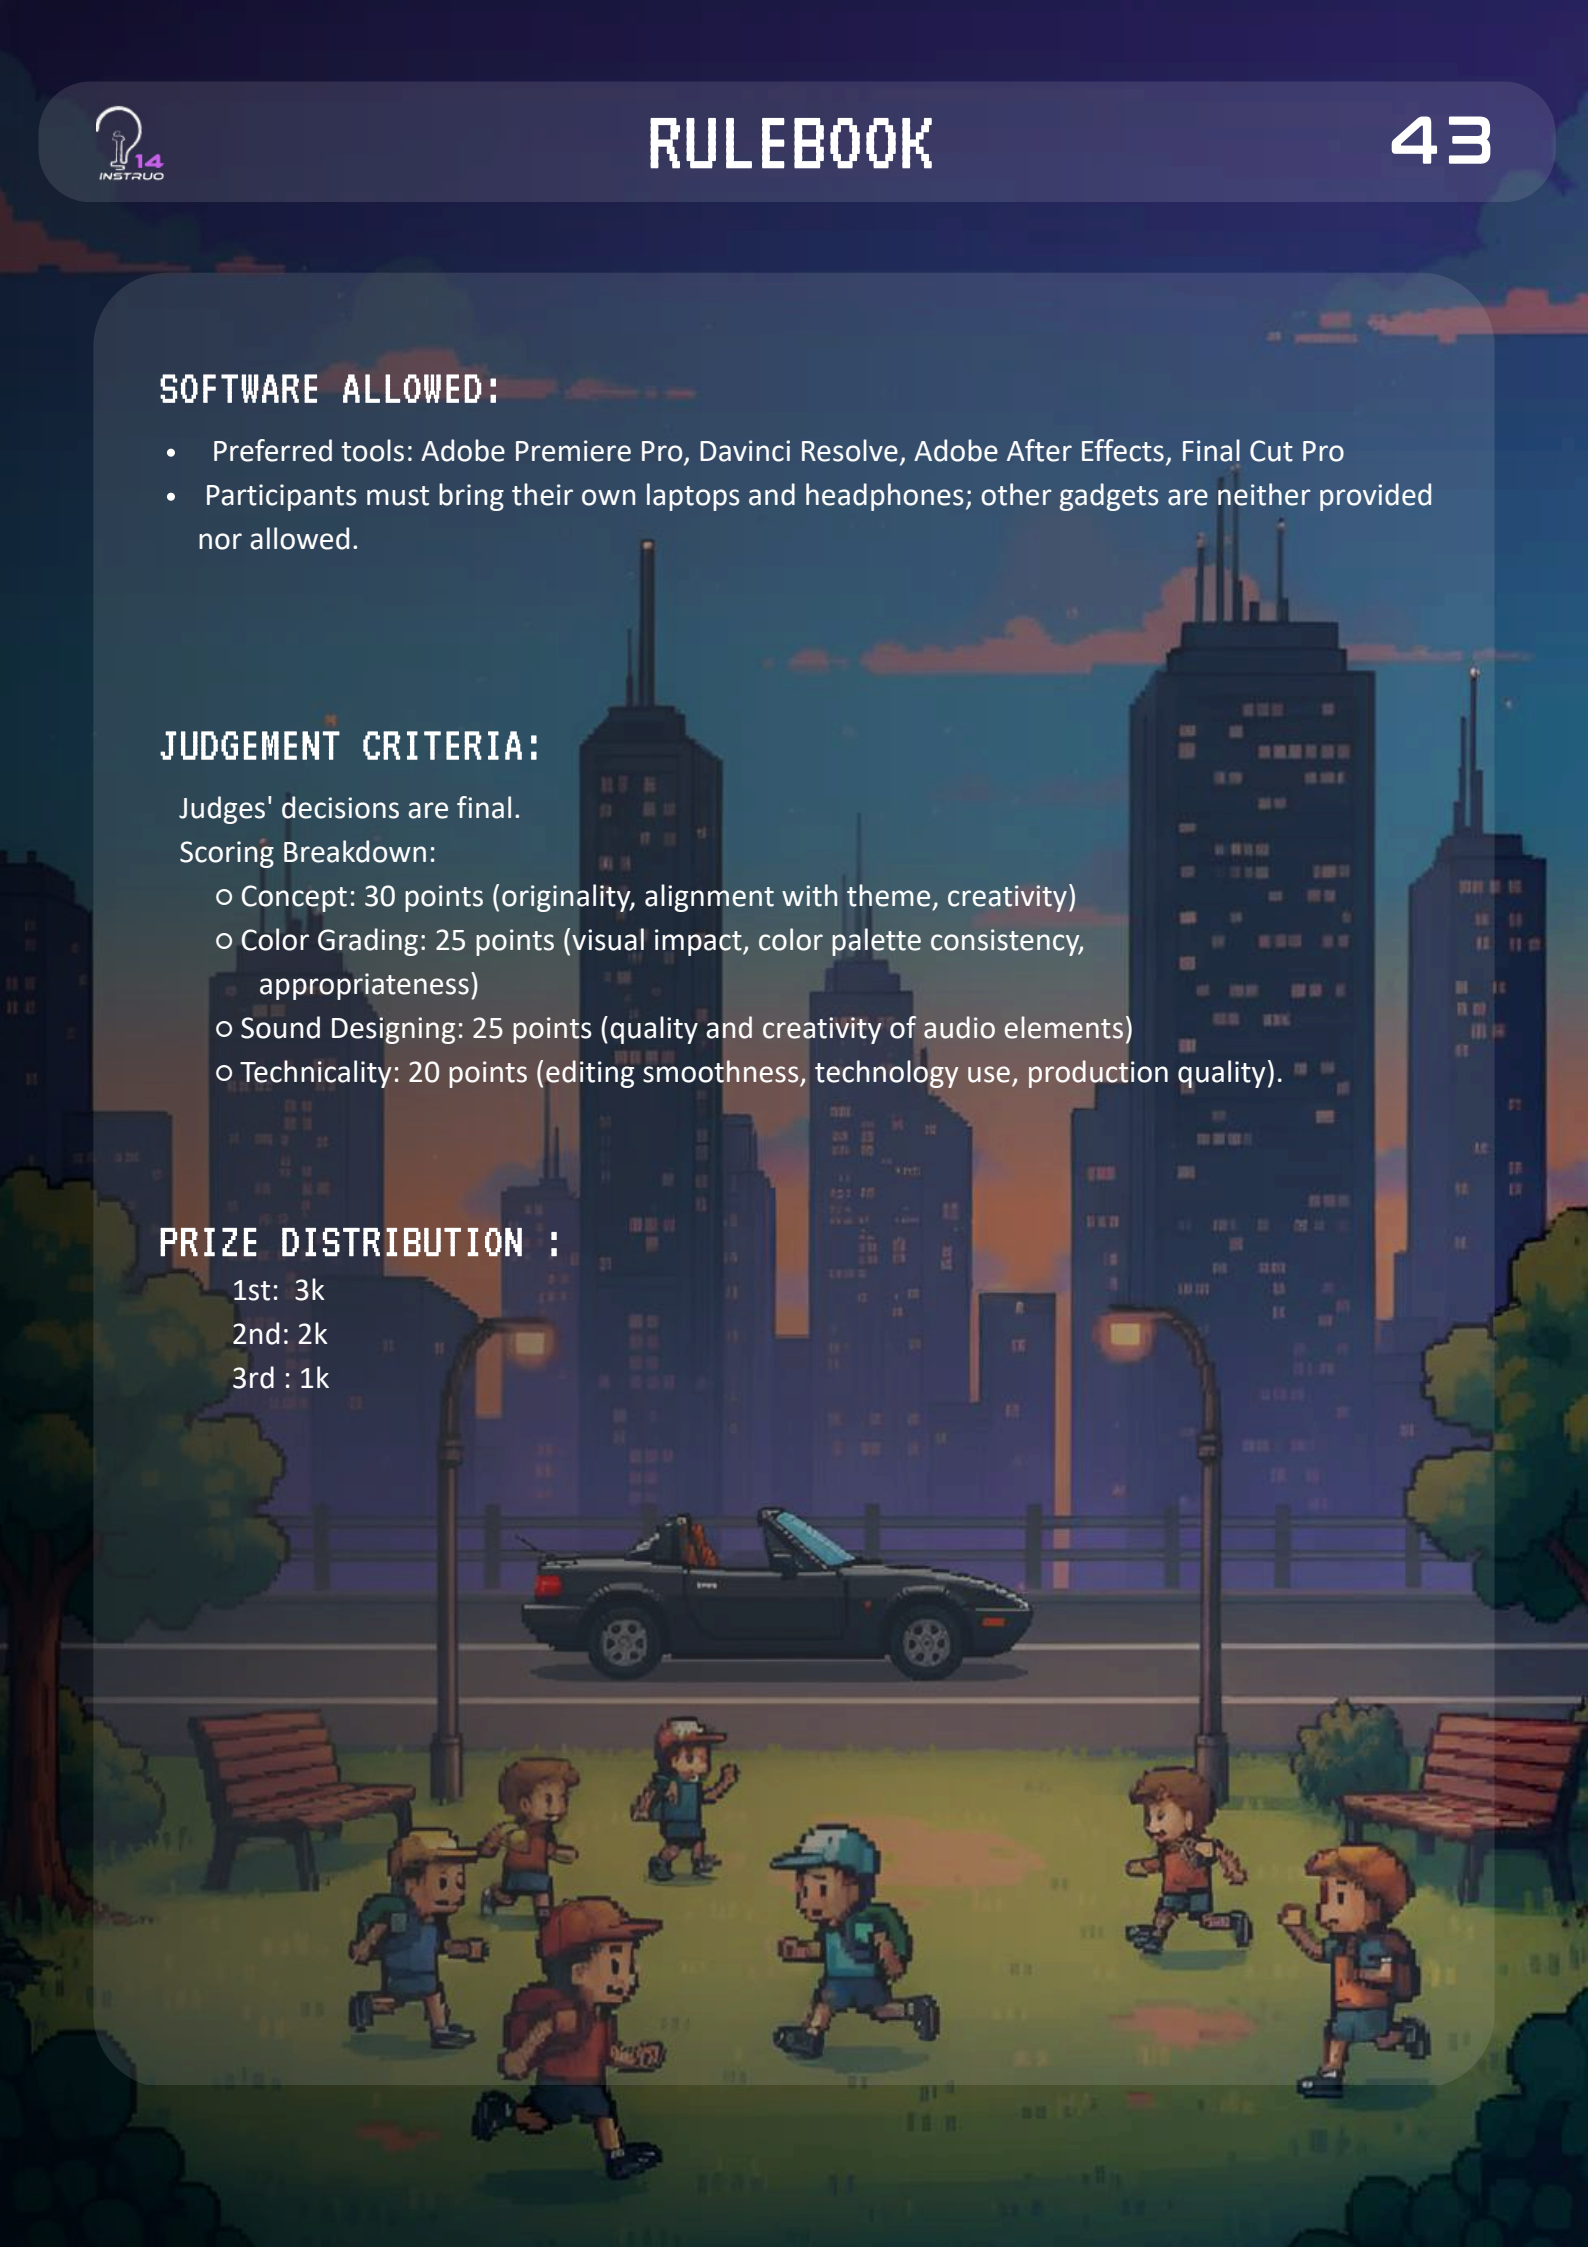

- o Concept: 30 points (originality, alignment with theme, creativity)
- o Color Grading: 25 points (visual impact, color palette consistency, appropriateness)
- o Sound Designing: 25 points (quality and creativity of audio elements)
- o Technicality: 20 points (editing smoothness, technology use, production quality).

PRIZE DISTRIBUTION :

1st: 3k

2nd: 2k

3rd : 1k

FOUNDER'S GOAL

AIM: Couple Founders Goals is an interactive offline event where participants, either in pairs or as individuals, have two hours to create humorous sales videos featuring quirky items found around the campus. The event focuses on fostering creativity, humor, and presentation skills, offering participants a chance to showcase their unique talents and teamwork. The best videos, highlighting innovative ideas and collaboration, will receive awards. It's a fun-filled opportunity for everyone to express themselves and enjoy a lively, creative atmosphere!

TEAM SPECIFICATION :

- Participants can register as a pair or as individuals before the event.

PRIZE WORTH : 10K

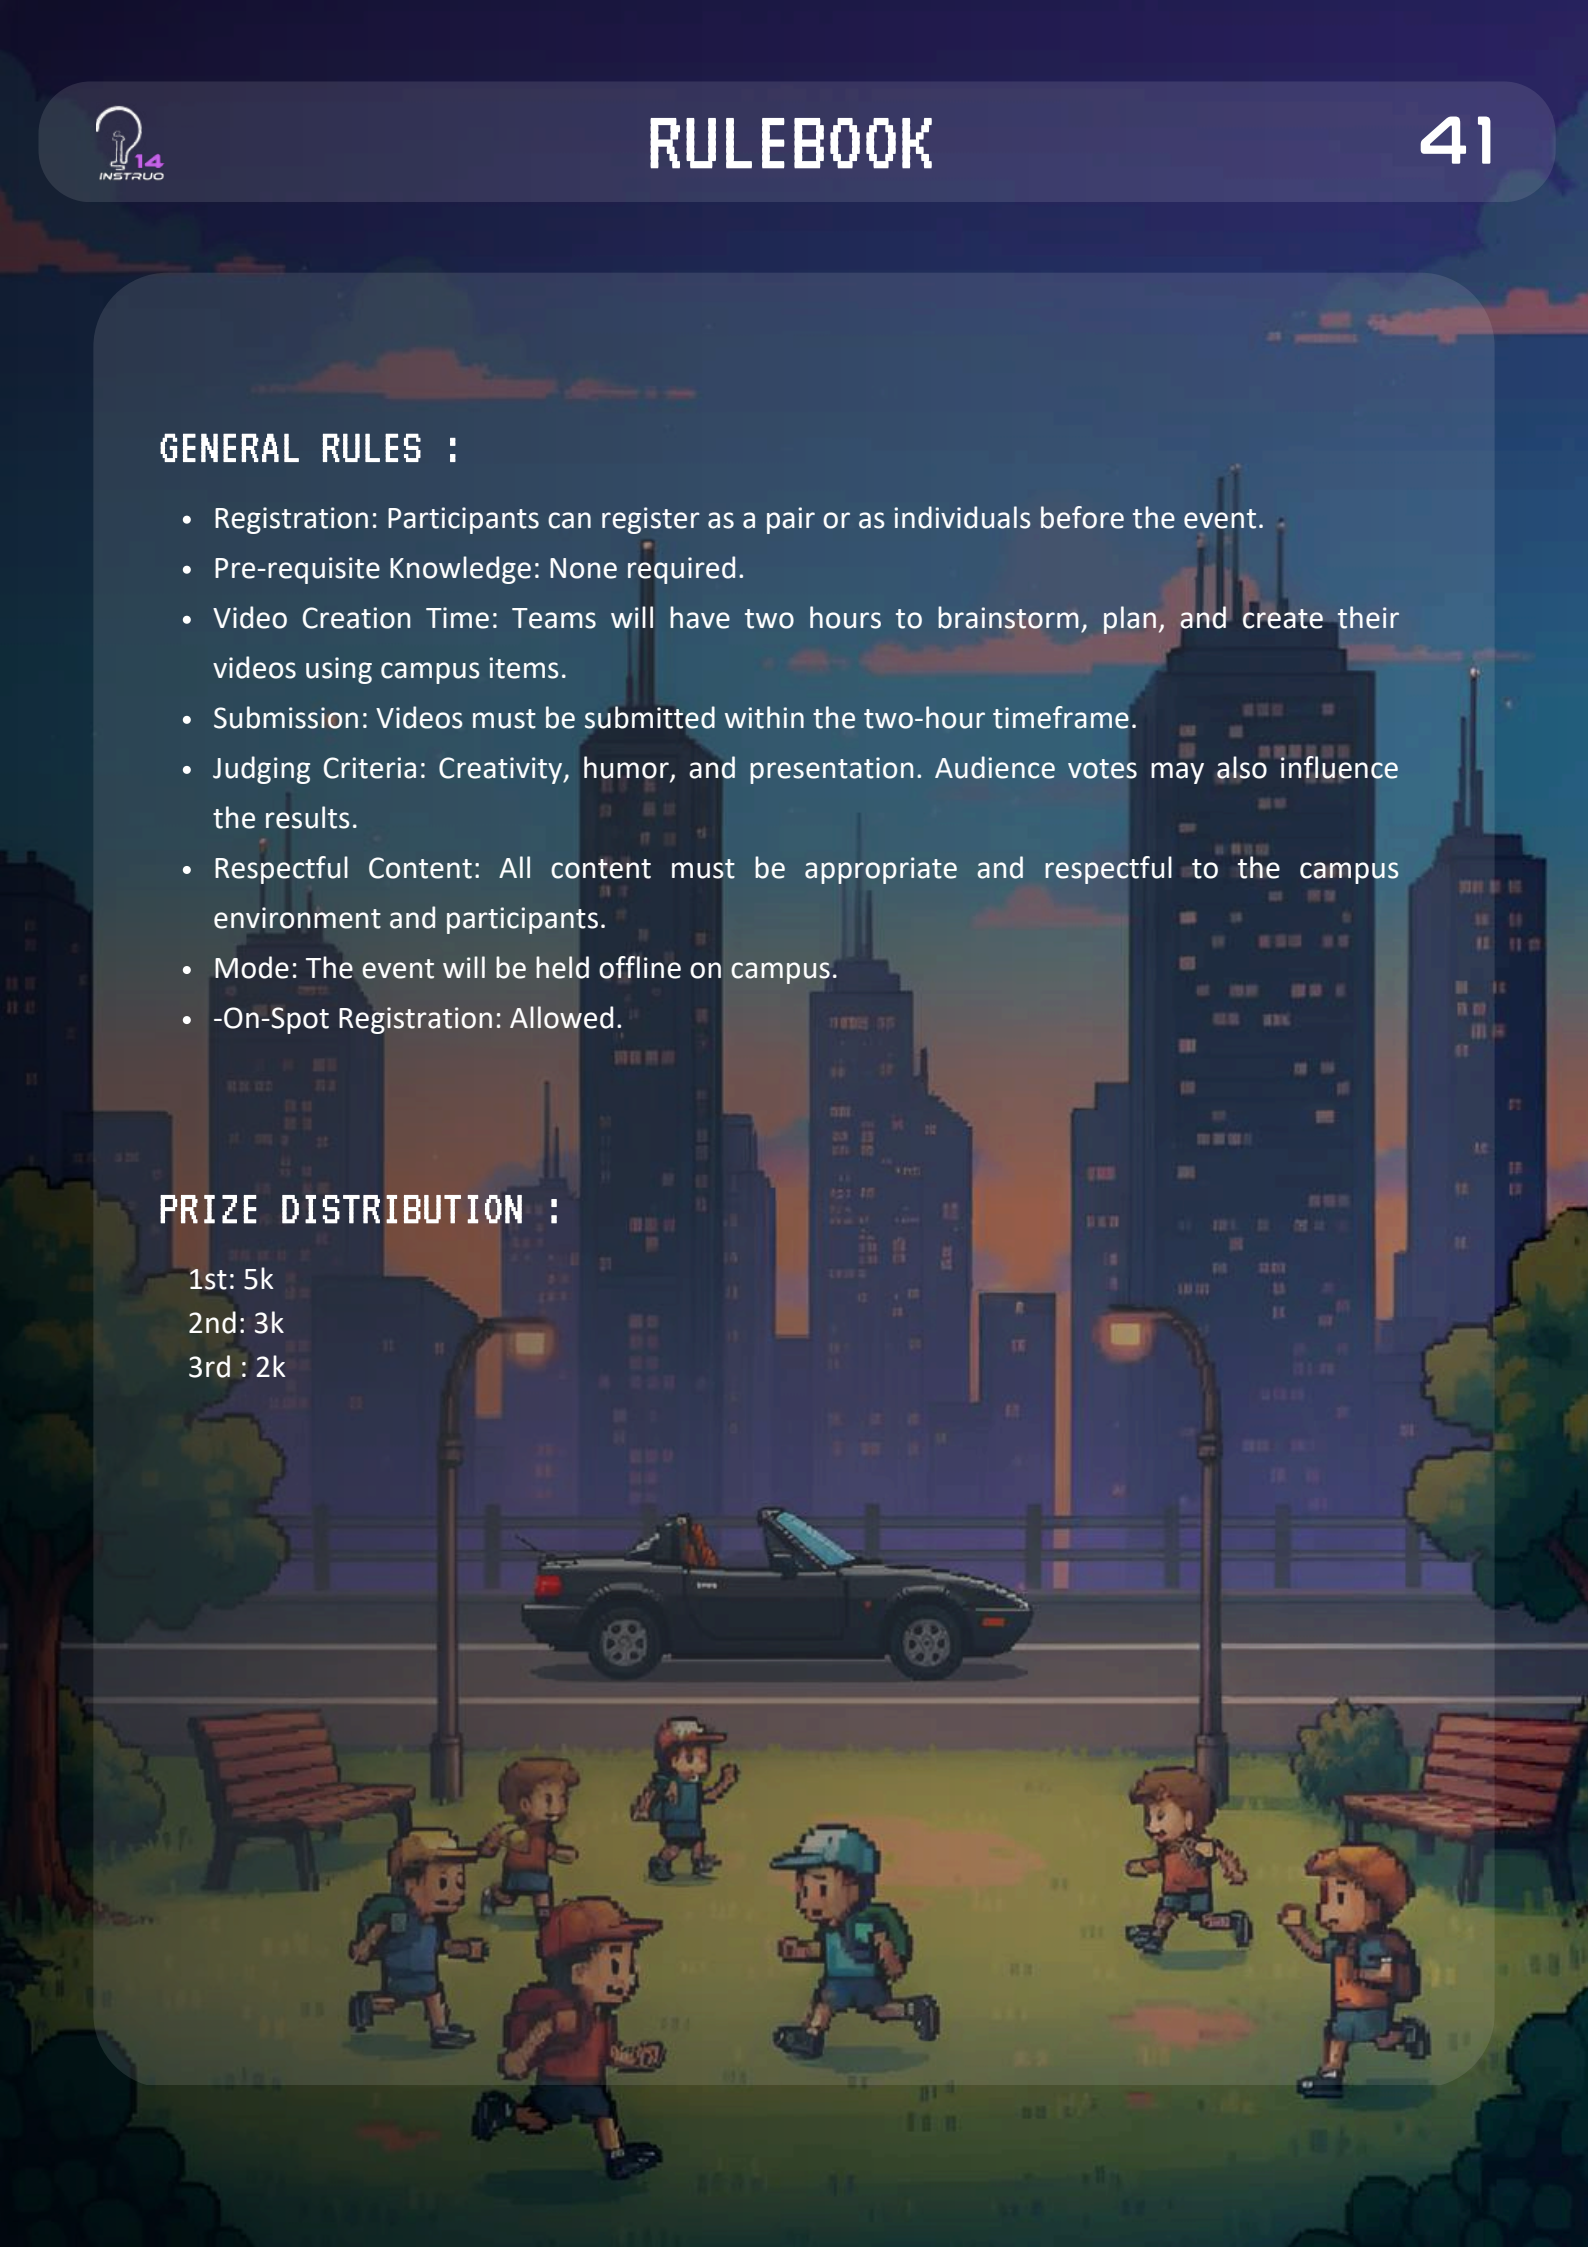

Coordinator : Yash Mahajan : +91-9503672254

GENERAL RULES :

- Registration: Participants can register as a pair or as individuals before the event.
- Pre-requisite Knowledge: None required.
- Video Creation Time: Teams will have two hours to brainstorm, plan, and create their videos using campus items.
- Submission: Videos must be submitted within the two-hour timeframe.
- Judging Criteria: Creativity, humor, and presentation. Audience votes may also influence the results.
- Respectful Content: All content must be appropriate and respectful to the campus environment and participants.
- Mode: The event will be held offline on campus.
- -On-Spot Registration: Allowed.

PRIZE DISTRIBUTION :

1st: 5k
2nd: 3k
3rd : 2k

IGNITE

Eligibility criteria for participation:

Anyone can participate

Team size: 1-3

Pre-requisite Knowledge: None

Registration deadline: 1 day before event

ROUND 1 :

Rules & Regulations (Round 1):

- Case Study to be written on the topic given on spot, within a given time duration.

Marking Scheme/ Judging criteria (Round 1): On the basis of written content.

Judges (Round 1): ICCHE Core

ROUND 2:

- Presentation on the topic given after results of round 1.
- Making PPT and presenting it with teammates in Institute Hall.
- Some cross questions will be asked related to it by judges.

Marking Scheme/ Judging criteria (Round 2): On the basis of presentation.

Judges (Round 2): Professors from Department of HSS

PRIZE DISTRIBUTION : 1st: 4k

2nd: 2.5k

3rd: 1.5k

PRIZE WORTH : 8K

Coordinator : Chitranjan Kumar : +91- 7413936203

Points of Information (POIs)/Question and Answers:

May be offered by the opposing team during a speaker's speech.

POIs must be concise (≤ 15 seconds) and relevant.

A speaker may accept or decline a POI.

Total Duration: About 10 to 12 minutes per debate topics (depending on the style of rounds progressions).

Timekeeping:

A timekeeper will monitor and signal time using a knock or bell:

1 knock $\rightarrow$ at the start of the final minute of a speech.

2 knocks $\rightarrow$ when time has elapsed.

Strict adherence to time limits is required. Speeches exceeding the limit will be cut off.

Rules of Debate

Relevance: Arguments must directly relate to the motion and be supported with logical reasoning, evidence, and examples. Solely anecdotal evidence is insufficient.

Rebuttals: From the second speaker onward, each debater must rebut key arguments raised by the opposing side while presenting their own case.

Interruptions: Only POIs are permitted; other interruptions are strictly prohibited.

Civility: Arguments may be forceful and even deprecating, but not aggressive, insulting, or personal.

Ad hominem fallacies will not be tolerated.

Repetition: Excessive repetition of arguments is discouraged. Debaters should be concise and impactful.

Judge's Authority: The judge(s) will score based on Content, Strategy, and Style/Fluency. Their decision is final and binding.

Style of Round Progression:

Rounds can proceed either as a ladder competition or a league stage competition, depending on the level of participation to accommodate all the teams and will be informed beforehand.

PRIZE DISTRIBUTION :

1st: 4k

2nd: 2.4k

3rd : 1.6k

JUNKYARD

INTRODUCTION:

Junkyard is a two-round event that blends problem-solving with creativity. Teams will begin with a written aptitude challenge, and those who qualify will move on to a practical round where they must build a working model using provided scrap materials. The event is designed to evaluate analytical ability, innovation, and teamwork.

OBJECTIVE

The event consists of two stages:

- Round 1: An aptitude-based test with 30 questions.
- Round 2: A design challenge where shortlisted teams will use scrap to develop a model or structure that addresses a given problem statement.

PRIZE WORTH : 6K

Coordinator : Anish Mansuri +91-8340243520

BASIC INFORMATION:

Registration: Through Google Forms (open until 1 hour before Round 1).
Team Size: 2–3 participants per team.
Rounds: 2

Venue:

- Round 1 – Classroom/Hall
- Round 2 – Workshop/Amenities Area

Duration:

- Round 1 – 1 hour
- Round 2 – 2 hours

EVENT FLOW

General: Junkyard is divided into 2 rounds. Only teams that qualify in Round 1 will be eligible for Round 2. No new entries are permitted in the second round.

Round 1 – Aptitude Test:

- Teams will answer 30 aptitude questions (Quantitative Ability, Logical Reasoning, and Verbal Ability).
- Duration: 1 hour.
- Question papers will be distributed by the organizing team.
- Results will be shared with the teams through the official WhatsApp group.

Round 2 – Scrap Challenge:

- Qualified teams will be provided with a fixed number of cards and other basic materials. Their task is to design and construct the tallest free-standing structure possible within a time limit of 2 hours.
- The structure must be stable and able to stand on its own without external support.
- Models will be judged based on height, stability, and efficient use of materials. In case of a tie, design creativity will be considered.

RULES AND REGULATIONS:

- Teams must arrive at least 10 minutes before the start of each round.
- A participant cannot be part of more than one team.
- Use of mobile phones or digital devices is strictly prohibited during Round 1. Any violation will lead to disqualification.

Round 1:

- Participants should carry their own pens.
- Any form of malpractice will result in immediate disqualification.

Round 2:

- All necessary materials will be provided on-site.
 - Copying or replicating other teams' ideas is not allowed.
- The decision of the event coordinator will be final in all matters.

MATHEMANIA

TEAM SPECIFICATION

- Each team can consist of maximum 2 members.
- Every team must consist of unique members (no overlapping participants).
- Round 2 will be an individual participant round (done separately).

GAMEPLAY / ROUNDS

Round 1 –

Basic Mathematics & Aptitude Test

- Filled with questions from pure mathematics, logical reasoning and quantitative aptitude.
- Negative marking will be applied.
- Participants must bring their own ball pens.

Round 2 – Desmos Event

- Participants will be given a Desmos link to recreate images using mathematical equations.
- They must submit the modified link through a Google form.
- Each question will include an image watermarked with the coordinate plane to help trace it using equations.

GENERAL RULES

- Participants must report 15 minutes prior to each round.
- Use of any kind of electronic devices is strictly prohibited.
- Coordinator's decision is final; no arguments will be entertained.
- Any participant found cheating by any means will be immediately disqualified from the event.

SPEEDCUBING

EVENT FLOW:

- DAY 1–3: BOOTH OPEN FOR CUBE SOLVES.
- DAY 3 (OPTIONAL): IF PARTICIPANTS > 60 : TOP 8
→ LIVE FINAL SHOWDOWN (2 SOLVES EACH).

Event Rules (for Booth + Finals Format)

1. Participation

- Open to all Techfest attendees.
- Cubes will be available at the booth.
- Participants may bring their own cubes if they wish.
- Only standard 3x3 cubes (mechanical or magnetic) allowed.
- Electronic smart cubes or timer cubes are not allowed.

Registration

- On-spot registration at the booth.
- Each participant will be assigned a unique ID number. (name/college/email).
- Each participant gets 1 free attempt per day.
- Extra attempts may be allowed if time permits after paying a minimal fee.

Scrambling & Inspection

- Cubes will be scrambled by event volunteers.
- Each participant gets 15 seconds inspection time before starting.
- They may look at the cube but must not turn any face during inspection.
- The participant signals readiness by saying "Ready."

Timing

- A Stackmat timer will be used.
- If unavailable, a digital stopwatch and a judge will time the solve.
- Solve starts when the participant lifts hands from the timer.
- Solve ends when both hands are placed back on the timer (or when the cube is fully solved and the judge stops time).

Valid Solve

- A solve is considered valid when:
- All faces are solved (each color uniform).
- The Cube is in a fully aligned position ($\leq 45^\circ$ misalignment allowed).

Penalties

Condition	Condition
One face misaligned ($>45^\circ$)	+2 seconds
Starts before "go" signal	+2 seconds
Cube not completely solved	Cube not completely solved
Disturbing others / breaking cube	DNF or Disqualification

Fair Play & Conduct

- No external help, hints, or talking during the solve.
- Participants must not tamper with scramble or timer.
- Judges' decisions are final and binding.
- Be respectful towards organizers and other participants.

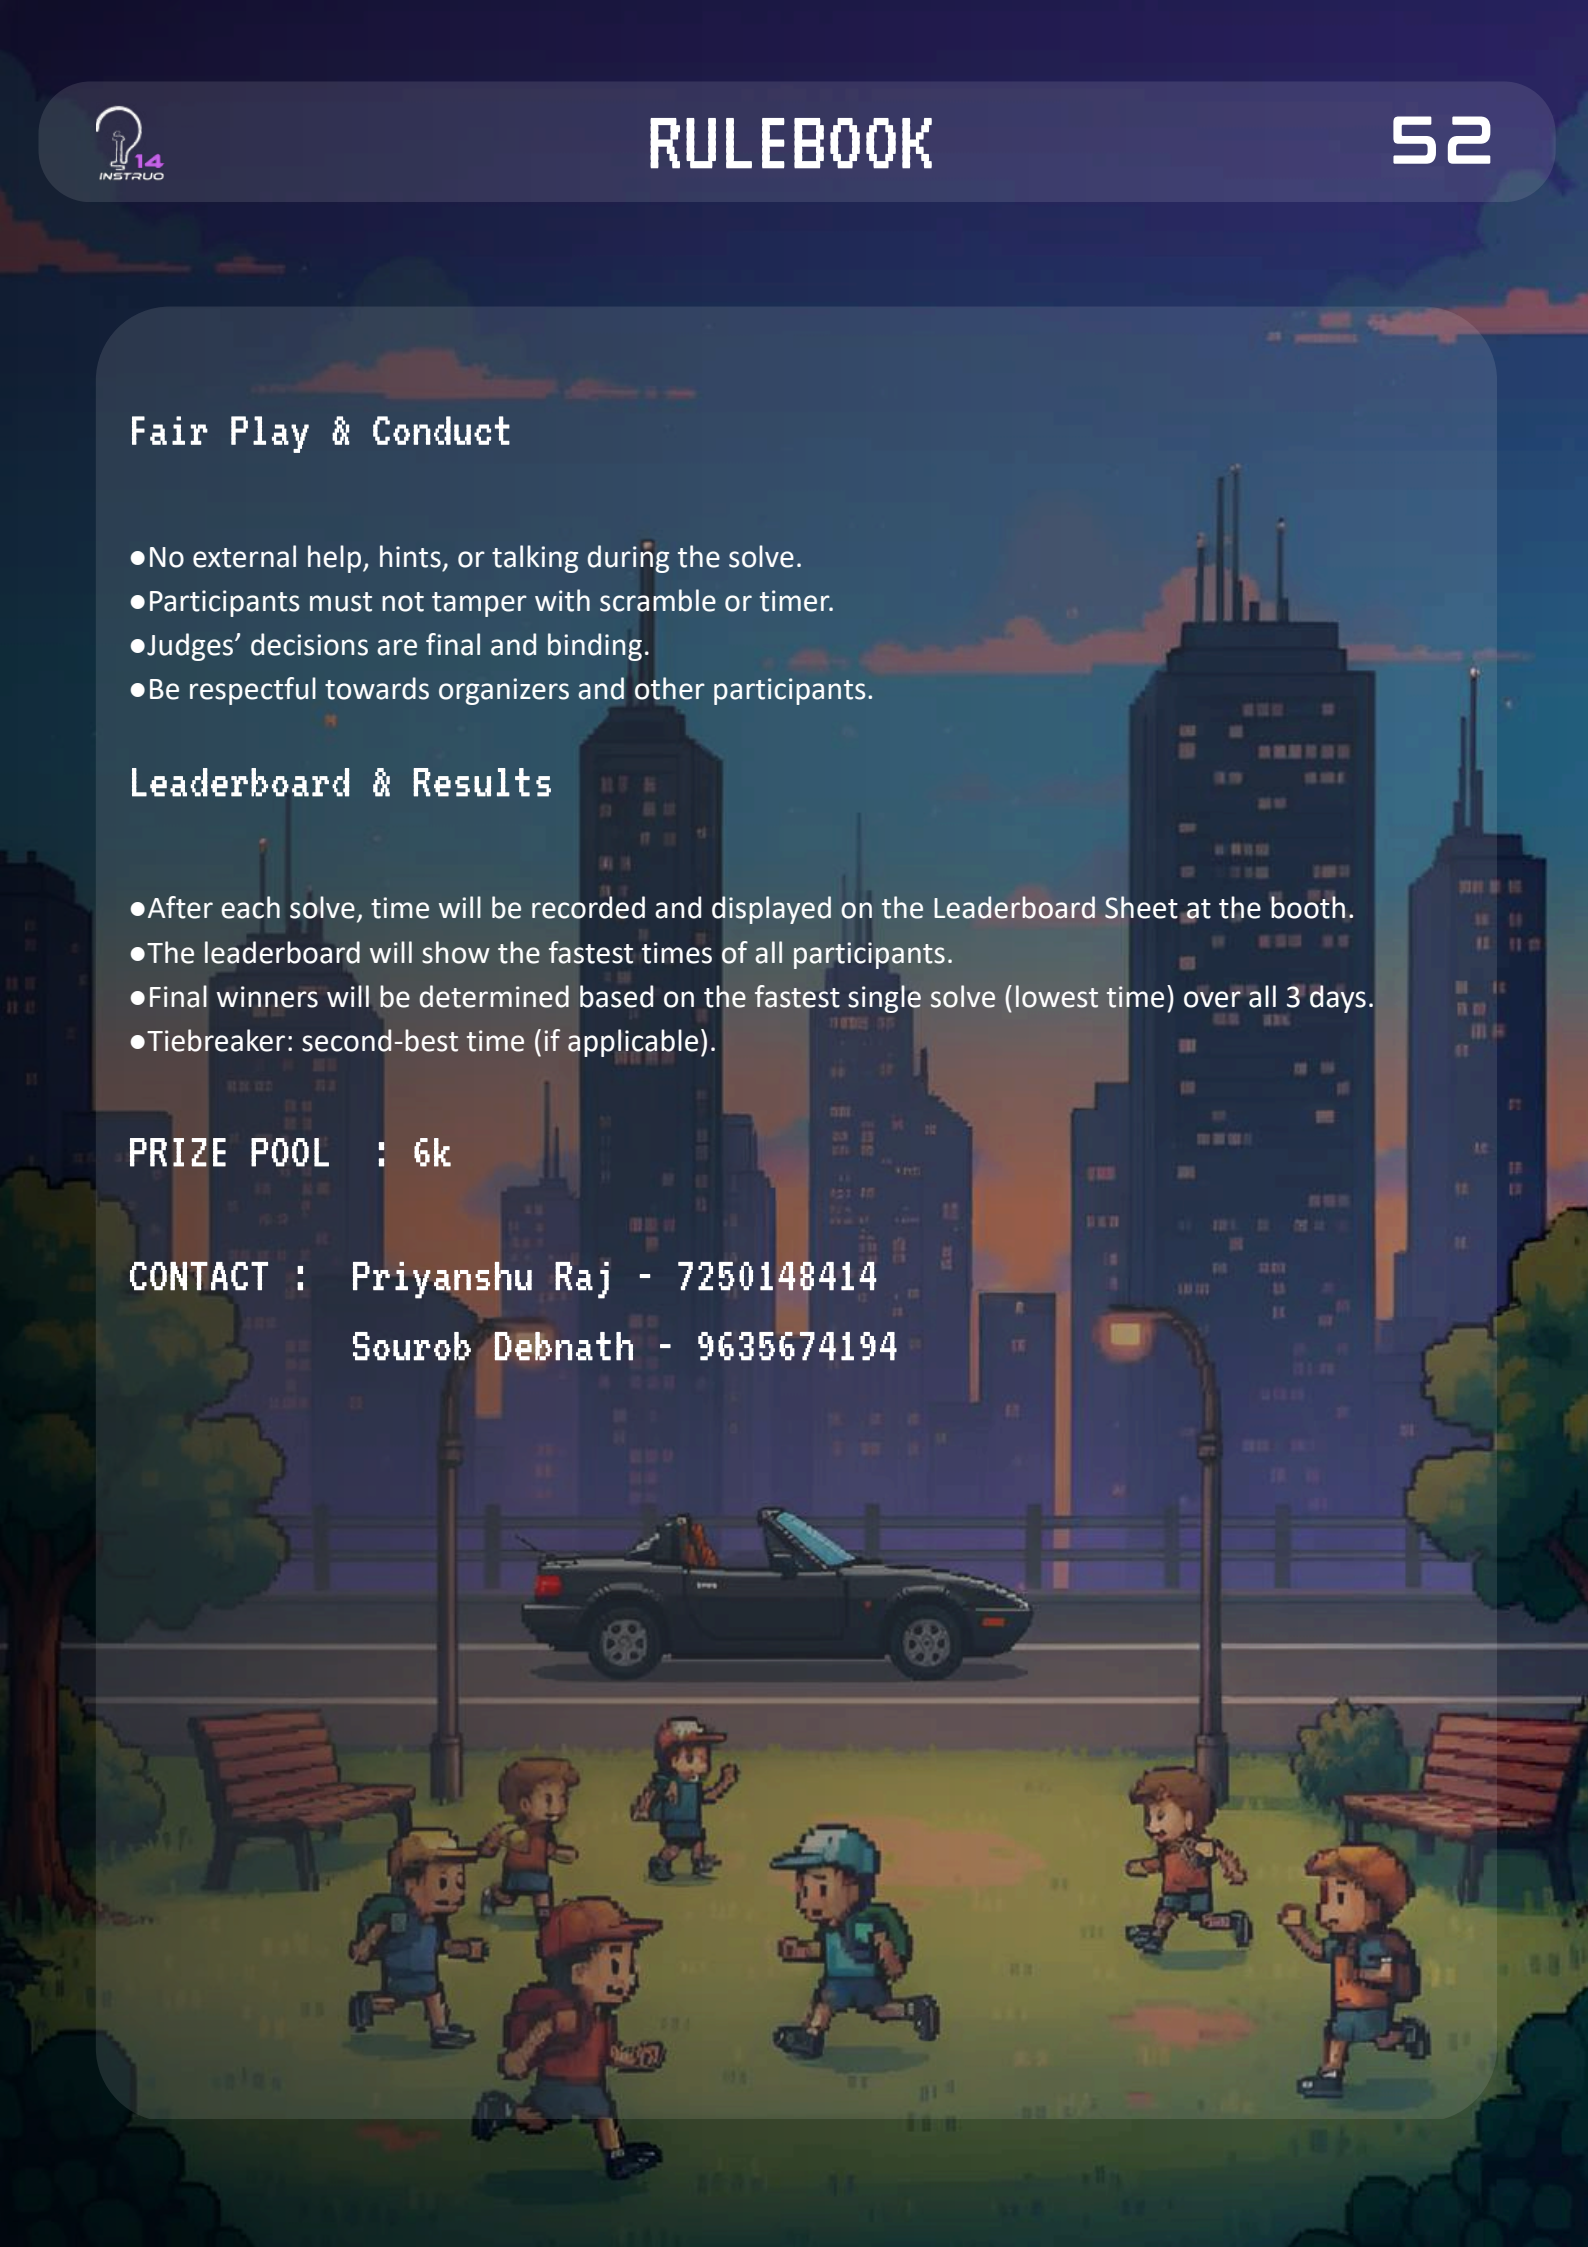

Leaderboard & Results

- After each solve, time will be recorded and displayed on the Leaderboard Sheet at the booth.
- The leaderboard will show the fastest times of all participants.
- Final winners will be determined based on the fastest single solve (lowest time) over all 3 days.
- Tiebreaker: second-best time (if applicable).

GAMING EVENTS

B G M I

BRIEF INTRODUCTION OF EVENT

- Prepare for the ultimate Battlegrounds Mobile India (BGMI) face-off — where strategy meets skill and every move counts. Only the best squads will rise, dominate, and claim the championship throne!

TEAM SPECIFICATION :

- A team should consist of 4 or 5 members, each team must consist of unique members.

FLOW OF EVENT

- **Semi-Finals Overview:** The Semi-Final stage will feature an intense clash between 32 qualified teams, divided into 2 groups of 16 teams each. Every group will battle it out across 2 dynamic maps.
- At the end of this round, the top 8 teams from each group would be qualified for the FINAL round.
- **Date and timings for semi final round:**
31st oct 2025
Timing - 9 PM to 12 PM

PRIZE WORTH : 10K

- **Finals Overview:** The Final stage will feature an intense clash between 16 qualified teams out across 3 dynamic maps.
- **Date and timing for final round:**
1st and 2nd NOV 2025
Timing - 9 PM to 12 PM

GAMEPLAY :

- It is a 4(+1) player team tournament. A 4 man-starter roster and up to 1 substitute.
- Emulators are not allowed in any game mode organized. Any game modifying tools except 'gfx tool' is not allowed.
- Any use of unfair means such as aimbot, trigger bot, esp etc. Will result in disqualification.
- If a team/player fail to join the room in time, their squad/they will be given 0 points for it.
- For the tiebreaker of the points, position points will be considered for breaking the tie.
- For the further tiebreaker, number of chicken dinners will be considered.
- Organizers would not be held responsible for connectivity issues on the participant's side.

BGMI TOURNAMENT POINTS TABLE:

FIFA

EVENT OVERVIEW

This tournament is for FIFA 23 on PC in 1 versus 1 mode. All participants must adhere to the rules below to ensure a fair and enjoyable competition.

GAME & PLATFORM DETAILS

- Game: FIFA 23
- Platform: PC
- Mode: 1v1
- Match Duration: 6 minutes per half (default)
- Difficulty: World Class
- Camera: Standard

TEAM SELECTION:

Either club teams or national teams; custom/edited teams not permitted

TOURNAMENT FORMAT:

- Single elimination (knock-out) format.
- Each match: one game. If the score is tied after regulation time, extra time followed by a penalty shoot-out will decide the winner.

PRIZE WORTH : 6K

Coordinator : Pritam Bhattacharjya: +91-7865009382

GENERAL GAMEPLAY RULES

- Players must be ready at their assigned PC when their match begins.
- Pausing is allowed only when the ball is out of play or in the event of an agreed-stop. Abuse of pause may lead to forfeiture.
- No coaching, outside assistance or second-player control during matches.
- Controller/settings may be configured before kick-off only. No changes mid-match.
- Any form of cheating, use of exploits, or unsportsmanlike behaviour will result in immediate disqualification. (See Code of Conduct)
- In case of technical issues (e.g., disconnection, hardware failure), the organisers' decision is final.

CODE OF CONDUCT

- Participants must maintain integrity, respect other players, organisers and officials at all times. This includes behaviour both in-game and via any tournament chat or channel.
- Harassment, discriminatory language, match-fixing, deliberately losing matches, gifting games or collusion will not be tolerated.
- The organisers reserve the right to issue warnings, match forfeiture, disqualification, or prize withdrawal depending on severity of violation.
- All decisions by the organising committee are final and binding.

MATCH REPORTING & VERIFICATION

- After each match ends, results must be immediately reported to the tournament official. Screenshots or proof of result may be required.
- If a player fails to show up or delays beyond a reasonable time (as determined by the coordinator) without valid reason, a walkover may be awarded to the opponent.
- Discrepancies in reported scores or proof may be investigated and could result in disqualification.

PRIZE POOL

- 1st Place: ₹3000
- 2nd Place: ₹2000
- 3rd Place: ₹1000

KING'S CONQUEST

AIM: Prepare yourself for an intense clash of intellect at Instruo's Chess event! The atmosphere is competitive yet educational, offering you a chance to enhance your strategic thinking while having fun.

TEAM SPECIFICATION :

- Individual participants.

GAMEPLAY :

- Touch and move rule will be applicable.
- With 2 illegals you will lose the match. After one illegal you have to stop the clock and call the arbiter.
- All fide rules are applicable.
- Arbiter decision is the final decision. You can challenge the decision with a pay of ₹ 100.

PRIZE WORTH : 8K

Coordinator : Anjishnu Gupta: +91-8768453342

REAL CRICKET

FORMAT:

- Walk In Registration.
- 1 v 1 (2 Overs).
- Total Prize Money divided as per the matches.
- Every match should be having a minimum Prize Amount.
- Minimum 25 Matches.

PRIZES:

- Prizes worth **Rs.10,000**

VALORANT

BRIEF INTRODUCTION OF THE EVENT:

This event is based on selecting and awarding the best of the best in Valorant.

BASIC INFORMATION:

- Registration Fees: Free for IEST students and ₹300 for non-IEST students, no re-entry allowed.
- Pre-requirements: Laptop with Valorant and Discord installed, stable internet connection.
- Venue: Student Amenities Center, IESTS
- Participation: team of 5 players, coach (not compulsory), and one extra player to be informed beforehand.
- Platform: Discord and Valorant.
- No. of rounds: 3 (elimination, semi-finals, finals).
- Duration of each round: 100mins

PRIZE WORTH: ₹8K

Coordinator : Debjit Maity: +91-8167025227

FLOW OF THE EVENT

- Registration will be done through Google Form. Participants will be required to join the Discord server of INSTRUO 14.0.
- The total teams will be divided into two pools.

- ROUND 1-Each pool will have one match (best of 1) based on knockout, and teams moving forward will have more knockouts based on the flow of the events, until 4 teams are left. Overtime will be like 'Endgame'(after 12-12 score first team to get 13-12 score wins)
- ROUND 2- The teams will have a match based on best of 1, and two teams will be selected for the finals. Overtime will be normal competitive-wise (after a 12-12 score, the first team to win two consecutive rounds wins)
- ROUND 3-Finals and bronze match will be best of 3. Overtime rules same as ROUND 2

RULES AND REGULATIONS:

- The tournament will be only on the Mumbai Server.
- The matches will be best of 1 (elimination-based), the final will be best of 3.
- All weapons are allowed.
- All the players must sit in the respective voice channel through mobile/PC.
- By Patch notes 10.01, the maps played will be: Abyss, Ascent, Bind, Breeze, Split, Sunset, Haven, Icebox, Fracture, Pearl, Lotus.
- The veto process will be explained by the respective admins.
- A technical pause will be of 5 minutes.
- Tactical pause will be of 1 minute each (2 times, as per the RIOT tactical timeout section).
- Coaches must be on mute during the game after the agent selection is done, and can unmute only in a tactical timeout.
- Only coaches are allowed to sit in the coach slot; no players or managers are allowed to sit in the coach slot.
- The max time to wait will be 10 minutes; if the team does not show in that 10 minutes, the opponent will get a forfeit win.
- In case of dispute, the verdict of the admins will be final.

PRIZE DISTRIBUTION :

- 1st : 4k
- 2nd : 2.5k
- 3rd : 1.5k
